

To heads of organisations
participating in the electronic
exchange
with the Bank of Russia

On installation of AWS of a BoR Customer-FMS
and relevant operation manuals

Information notice No. VN-16-4-6-1/8037 dated 21.09.2022

The Payment System Operation Centre of the Information Technology Department of the Bank of Russia (hereinafter, the PSOC ITD) informs exchange participants (hereinafter, EPs) that the Bank of Russia has published the following documents on its website www.cbr.ru/eng/development/mcirabis/involve_spfs/:

AWS of a BoR Customer-FMS version 2022.4.1 ('spfs2022.4.1.rar')

and operation manuals:

'AWS of a BoR Customer-FMS. Programmer's guide.docx' ('kbr-spfs_programmer.rar') (hereinafter jointly referred to as BoR Customer software).

Please find changes made to the BoR Customer software and operation manuals in the Annex to this information notice.

Hereby, the PSOC ITD draws the attention of EPs to the fact that the folder extracted from the '*.rar' archive contains 'hash.txt' file and '*.zip' archive. The 'hash.txt' file contains a list of the BoR Customer software controlled files and a hash code calculated with the hash algorithm in accordance with GOST R 34.11-2012.

The archive was created using WinRAR 5.50 application.

The PSOC ITD also reminds you that when the BoR Customer software is replicated to EPs using the system 'Bank of Russia Transport Gateway to Exchange Payment and Financial Messages with Customers of the Bank of Russia (the BoR Customer TG)', two information messages will be dispatched: a notification (about replicating new versions of the AWS of a BoR Customer-FMS) and a miscellaneous

message with recommendations on how to check the integrity of the BoR Customer software.

The BoR Customer software, version 2022.4.1, will be available for testing in the concurrent testing stand of the CDPC-level RABIS-NP sub-systems as soon as the distribution package is posted on the Bank of Russia website.

The deadline for the transition to the BoR Customer software, version 2022.4.1, and the UFEBM Album (version 2022.4.1) is 26 September 2022. This notice will be published on the Bank of Russia website at www.cbr.ru/eng/development/mcirabis/involve_spfs/.

Contacts of the Unified User Support Service at the Information Technology Department are as follows:

email: SPFS@cbr.ru.

Annex: “What’s new” 1 p.

Tatiana Maevskaya

Acting Deputy Director of Department -

Director of Payment System Operation Centre

What's new

Changes to the AWS of a BoR Customer-FMS, version 2022.4.1:

- An error was corrected in the extension of proprietary format files accepted from the Service Bureau customers;
- Selection of a folder for EMs uploading to the Service Bureau customers' destinations as the AC envelopes was corrected;

Changes to the operation manuals:

AWS of a BoR Customer-FMS. Programmer's guide.docx:

- Section 3.1.4 'Requirements for files generated in the Service Bureau mode and the Service Bureau and FMS Participant mode', paragraphs 'Structure of a file name for generating ED501 envelopes' and 'Structure of a file name for a proprietary format message generated from the received ED501' were modified.
