<sup>1</sup> The International Investment Position of Russia is compiled on the basis of the methodology set out in the 6th edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6).

Notes. A positive sign denotes net increase in assets or liabilities; a negative sign denotes a net decrease.

Minor discrepances between the total and the sum of components are due to the rounding of data.

<sup>1</sup> The International Investment Position of the Russian Federation is compiled on the basis of the methodology set out in the 6<sup>th</sup> edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6).

Notes. A positive sign denotes net increase in assets or liabilities; a negative sign denotes a net decrease.

Minor discrepances between the total and the sum of components are due to the rounding of data.

# Balance of Payments of the Russian Federation

# **General Provisions**

Balance of payments of the Russian Federation (hereafter referred to as balance of payments) is a statistical statement, which reflects all economic transactions between Russian Federation residents and nonresidents within a reporting period.

Table "Balance of Payments of the Russian Federation" is compiled and published by the Bank of Russia quarterly.

Balance of payments data are used for elaborating the monetary policy of the state.

Balance of payments is compiled by the Bank of Russia based on Federal Law No. 86 FZ "On the Central Bank of the Russian Federation (Bank of Russia)" dated July 10, 2002 (as amended), Federal Law No. 282 FZ "On Official Statistical Accounting and State Statistics System in the Russian Federation" dated November 29, 2007 (as amended), and Order of the Government of the Russian Federation No. 1226 dated September 26, 1997 "On the Russian Federation's Adherence to the Special Data Dissemination Standard of the International Monetary Fund (IMF)".

The methodological basis for the balance of payments is set out in the sixth edition of the IMF's *Balance of Payments and International Investment Position Manual (BPM6).* 

Sources of information are comprised of reports on foreign economic transactions of Russian residents which are routinely received by the Bank of Russia from Russia's Ministry of Finance (Minfin of Russia), Federal Customs Service (FCS of Russia), Federal State Statistics Service (Rosstat), Ministry of Internal Affairs, Emergencies Ministry (MES of Russia), Frontier Service of the Federal Security Service, Ministry of Energy, Ministry of Transport, credit institutions, other financial corporations, nonfinancial corporations; partner country statistics, as well as the Bank of Russia's own data and estimation system.

A detailed list of reporting forms used to compile the balance of payments and other information of reference are available on the Bank of Russia's official website under directory *Statistics*. *Macroeconomic Financial Statistics*. *External Sector Statistics*.

Table "Balance of Payments of the Russian Federation" is the analytical presentation of the balance of payments data. In contrast to the standard presentation of the data, which has the template that meets international standards, in the analytical presentation the aggregates' grouping and identification of components that are of substantial importance for the economy of the Russian Federation enhance the capabilities for analyzing international economic interaction of the country.

Balance of payments data for previous periods are revised mainly because of the updating of reports, emerging new information sources, methodological improvements, and/or changes in the methods of compilation of certain aggregates as well as reclassification of financial instruments (aggregates). Such an approach ensures access to the most updated data for all users of balance of payments statistics.

Balance of payments data in the analytical presentation are posted on the Bank of Russia's official website and published in the Bank of Russia Bulletin.

# Individual Indicators Highlights

**1.** Current account represents a balance on transactions between Russian Federation residents and nonresidents in goods and services, primary income (compensation of employees, investment income, and rent) and secondary income.

**1.1. Goods.** Recorded under this item is the value of goods whose ownership rights were transferred within a reporting period from residents to nonresidents (exports) and from nonresidents to residents (imports).

In compiling trade balance aggregates, merchandise exports / imports transactions' data recorded by the FCS of Russia are supplemented with data on the following transactions: exports / imports of goods procured in domestic /foreign ports by carriers; goods exported /imported by individuals with the purpose of reselling thereof; goods sold to nonresidents with the transfer of ownership rights without their crossing the border, including exports of fish and marine products caught in the high seas; goods undeclared and /or misdeclared when imported by legal entities; goods acquired /sold via Internet trade; other goods exports /imports for which economic ownership rights were transferred from residents to nonresidents and from nonresidents to residents.

Goods recorded in accordance with customs regimes for processing thereof are excluded from the FCS of Russia data. Value of merchandise exports is increased by the net exports data on goods sold under merchanting outside the economic territory of the Russian Federation.

Exports and imports of goods are presented at f.o.b. values (the f.o.b. is a term of delivery which implies that the value of the goods includes the cost as well as expenses on insurance, delivery and loading on board the carrier at the border of an exporting country).

Data on exports of major fuel and energy commodities are identified within the total merchandise exports values.

**1.2. Services** represent a balance on transactions in services between the Russian Federation residents and nonresidents. Services rendered by residents to nonresidents (exports) and those provided by nonresidents to residents (imports) are grouped by the most significant for the Russian Federation categories: transport, travel and other services (including manufacturing services; maintenance and repair services; construction; insurance; financial services; charges for the use of intellectual property; telecommunications, computer and information services; government services).

**1.3.** Compensation of employees shows a balance on remuneration of resident workers that are temporarily employed in a foreign economy and earnings of nonresidents working in the Russian Federation.

**1.4. Investment income** reflects a balance on income of the Russian Federation residents earned on foreign financial assets owned by them (in the form of direct, portfolio and other investment) and similar income payable to nonresidents resulting from their investments in the economy of the Russian Federation.

Investment incomes receivable and payable are presented in breakdown by institutional sector and subsector. Separately identified are Federal and local governments of the Russian Federation, central bank, banks, other sectors. Other sectors include other financial corporations (except banks), nonfinancial corporations, households and non-profit institutions serving households.

**1.5. Rent** reflects a balance on incomes receivable and payable from leasing for the use of land and natural resources.

**1.6. Secondary income** represents a balance on current transfers between residents and nonresidents.

A transfer is an economic transaction resulting in provision without a quid pro quo by one institutional unit to another of a commodity, service, asset or ownership rights without any counterparts thereof being received in return as an equivalent. Current transfers are those that augment the disposable income and potential consumption power of a recipient country, and reduce the disposable income and potential consumption power of a donor country.

The main component of current transfers are personal transfers that include all current transfers in monetary form

and in kind receivable by Russia's households from nonresident households or payable by Russia's households for the benefit of nonresident households.

Classified as current transfers also are taxes on income and property, social contributions, social benefits, insurance premia and reimbursements (except life insurance), transfers within the framework of international cooperation, other current transfers.

2. Capital account includes a balance on acquisition / disposal of nonproduced nonfinancial assets, as well as a balance on transactions in capital transfers between the Russian Federation residents and nonresidents.

Acquisition /disposal of nonproduced nonfinancial assets reflects acquisition and disposal of assets that are not the result of production (land and its subsoil) and /or assets of intangible nature such as patents, copyrights, trademarks, franchising rights, etc.

Capital transfers represent large-amount transactions of irregular nature, e.g. debt forgiveness, investment grants, certain types of taxes, large-value gifts, inheritance, etc.

Net lending (+) / net borrowing (-) (balance on current and capital accounts) represents the sum of current account balance and capital account balance.

3. Net lending (+) / net borrowing (-) (balance on financial account, excluding reserve assets) is the residual balance on transactions with financial liabilities and assets (excluding reserve assets) between the Russian Federation residents and nonresidents. The outcome is calculated as the difference between the aggregates of net acquisition of financial assets (excluding reserve assets) and net incurrence of liabilities.

Net acquisition of financial assets, excluding reserve assets («+» - increase, «-» - decrease) represents the difference between an increase of residents' foreign assets and a decrease thereof resulting from financial transactions (excluding transactions related to international reserves).

Net incurrence of liabilities («+» - increase, «-» - decrease) represents the difference between an increase of residents' foreign liabilities and a decrease thereof resulting from financial transactions.

Financial assets and liabilities are classified by institutional sector and subsector: Federal and local governments of the Russian Federation, central bank, banks, other sectors.

Within sectors identified are data on direct investment. portfolio investment, loans, other assets and liabilities.

Direct investment is a category of foreign investment, which is made by a resident institutional unit of one economy with the purpose to exercise control or acquire a lasting influence on management of an enterprise located in another economy. Direct investment relationship arises when a direct investor owns directly equity assuring him /her 10 percent or more of the votes in managing the direct investment enterprise. Direct investment also includes transactions of direct investment enterprise to acquire equity and debt instruments of its direct investor (reverse investment) and transactions between sister enterprises. Sister enterprises are those that are under the control and influence of the same direct or indirect investor, but do not have any control or influence with respect to each other.

Direct investment is accounted for in the forms of equity (listed and unlisted stocks, shares, real estate), reinvested earnings and debt instruments (securities, loans), excluding transactions with debt instruments between related financial intermediaries in the same direct investment relationship.

Portfolio investment is a category of foreign investment in negotiable debt securities and equity, excluding those that are included under direct investment and reserve assets.

Within portfolio investment data on Federal government liabilities, extended information is provided on nonresidents' acquisition of sovereign bonds in the course of initial placement thereof, debt payments of principal amounts and coupons, reinvestment of earnings and secondary market transactions.

Loans are financial assets that are created when the creditor directly provides funds to the borrower and it is evidenced by nonnegotiable documents.

Other assets and liabilities. All transactions with nonresidents that are not classified within the sector under a separate category or financial instrument are accounted for under other assets and other liabilities.

Within other sectors' assets extended information is identified on transactions with cash foreign currency, trade credit and advances, indebtedness on supplies of goods according to intergovernmental agreements, non-classified transactions. The latter include those with the attributes of fictitious transactions related to foreign trade in goods and services, securities' trading, lending to nonresidents, and money transfers to residents' own accounts abroad for the purpose of cross-border money transferring.

4. Net errors and omissions is a statistical discrepancy which is derived residually as net lending / net borrowing of the financial account minus the corresponding item from the current and capital accounts.

5. Change in reserve assets represents a balance on transactions with international reserves that are at the disposal of the Central Bank of the Russian Federation and the Government of the Russian Federation. Comprehensive description of international reserves is provided in the methodological comments to Table 1.11.

# Table 1.2 **Direct Investment of the Russian Federation** (Based on the Balance of Payments, Flows Data)

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy. Control or influence may be achieved directly by owning equity that gives voting power in the enterprise, or indirectly through having voting power in another enterprise that has voting power in the enterprise. To ensure international comparability, in practice, for identification of direct investment relationships the following quantitative criterion is used: ownership of 10 per cent or more of the voting power in the direct investment enterprise.

Starting with 2012 the Russian Federation's direct investment data are compiled on the basis of the methodology set out in the 6th edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6) and the 4th edition of OECD's Benchmark Definition of Foreign Direct Investment (BMD4).

# **General Provisions**

The table «Direct Investment of the Russian Federation» contains data on direct investment inflows in the Russian Federation and direct investment outflows abroad broken down by sectors and instruments. Data on direct investment are compiled as components of the Financial Account, and they include reverse investment flows and intercompany relations. and are compiled according to the asset/liability principle. The data are published quarterly in millions of U.S. dollars.

Equity includes shares, stocks and other investment of foreign direct investors in equity of Russian enterprises as well as Russian direct investors in equity of foreign enterprises including financial aid without quid pro quo.

Reinvested earnings are earnings of direct investment enterprises not distributed as dividends or profit.

Debt instruments are instruments that are used between investors and direct investor enterprises including loans, debt securities and trade credits.

Sources of information are comprised of reports on foreign economic transactions performed by Russian residents. These reports are regularly obtained by the Bank of Russia from credit institutions, non-banking custodians, other financial institutions, non-financial organizations, Russia's Ministry of Energy, as well as partner countries' data and experts' estimates.

Direct investment data are posted on the Bank of Russia's official website.

## Individual Indicators Highlights

**Russian Federation's direct investment abroad** covers resident direct investors' claims on their direct investment enterprises, resident direct investment enterprises' claims on direct investors, and resident enterprises' claims on nonresident fellow enterprises.

**General government direct investment** includes transactions to acquire equity and shares of non-resident enterprises by the federal and local government.

Direct investment of banks and direct investment of other sectors include transactions connected with increases/ decreases in foreign assets in the form of equity, reinvestment of earnings, and debt instruments.

**Direct Investment in the Russian Federation** covers liabilities of resident direct investment enterprises to their direct investors, those of resident direct investors to direct investment enterprises, and liabilities of resident enterprises to non-resident fellow enterprises.

Direct investment of banks and direct investment of other sectors include transactions connected with increases/ decreases in foreign liabilities in the form of equity, reinvestment of earnings, and debt instruments.

# Table 1.3 Financial Transactions of Private Sector (Based on the Balance of Payments Data)

# **General Provisions**

The table contains data on transactions reflected in the financial account of the balance of payments. The definition of "private sector" includes the totality of institutional units, which are not related to General government or Central bank. When balance on financial transactions within the reporting period is positive, it means that the private sector has been a net creditor vis-à-vis nonresidents over the reporting period; when balance on financial transactions is negative, the private sector is assumed to have been a net borrower.

The Table's aggregates are compiled based on the analytical presentation of balance of payments data with quarterly periodicity.

Data on financial transactions of the private sector are posted on the official website of the Bank of Russia.

## Individual Indicators Highlights

Financial Transactions of Private Sector (Net lending (+)/ Net borrowing (-)) item is defined as combined total balances on Banks' and Other sectors' financial transactions.

Financial Transactions of Banks (Net lending (+)/Net borrowing (-)) item is computed as the difference between Banks' net acquisition of financial assets and net incurrence of liabilities thereof.

Net acquisition of financial assets by Banks represents the difference between an increase in Banks' foreign assets and a reduction thereof in the reporting period.

*Net incurrence of liabilities* by Banks represents the difference between an increase in Banks' foreign liabilities and a reduction thereof in the reporting period.

Financial Transactions of Other Sectors (Net lending (+)/Net borrowing (-)) item is computed as the difference between Other sectors' net acquisition of financial assets and net incurrence of liabilities thereof with an addition of "Net errors and omissions" item of the balance of payments with the opposite sign. Other sectors include nonfinancial corporations, other financial corporations (except banks), households and nonprofit institutions serving households.

Net acquisition of financial assets by Other sectors item represents the difference between an increase in Other sectors' foreign assets and a reduction thereof in the reporting period, net of the balance of payments item "Indebtedness on Supplies of Goods according to Intergovernmental Agreements" which relates to transactions of the General government.

Net incurrence of liabilities by Other sectors item represents the difference between an increase in Other sectors' foreign liabilities and a reduction thereof in the reporting period.

**Net errors and omissions** item is the statistical discrepancy arising from the difference between the Net lending / Net borrowing balance on financial account of the balance of payments and the Net lending / Net borrowing balance on current and capital accounts.

Conditionally, this item may be entirely attributed to Other sectors' financial transactions because recording thereof in compiling the balance of payments is most problematic.

# Table 1.4 External Debt of the Russian Federation

# **General Provisions**

Definition and basic characteristics of external debt (methodological principles, information sources, information on data dissemination, etc.) set out in the comments to Table 1.6 are applicable to the contents of this Table.

The Table's structure suggests the following institutional sectors as the main classification groupings:

General government;

- Central bank;

Banks:

- Other sectors.

Data on debt liabilities to direct investors and direct investment enterprises of *Banks* and *Other sectors* are reflected within these sectors' totals.

For each sector, data are classified by type of debt instrument.

# Individual Indicators Highlights

Individual indicators' characteristics under *General* government, *Central bank*, *Banks*, and *Other sectors* broadly correspond with these indicators' characteristics set out in the comments to Table 1.6.

*General government.* This category is represented with the Federal government's indebtedness detailed by type of creditor.

**Other sectors.** Data on indebtedness under financial lease arrangements are derived from the Loans indicator and shown as a separate item.

# Table 1.5 External Debt of the Russian Federation in Domestic and Foreign Currencies by Maturity

# **General Provisions**

Definition and basic characteristics of external debt (methodological principles, information sources, information on data dissemination, etc.) set out in the comments to Table 1.6 are applicable to the contents of this Table.

The Table's structure suggests the following sectors as the main classification groupings:

- General government;
- Central bank;
- Banks (excluding debt liabilities to direct investors and direct investment enterprises);
- Other sectors (excluding debt liabilities to direct investors and direct investment enterprises).

Debt liabilities to direct investors and direct investment enterprises of *Banks* and *Other sectors* are grouped separately.

Further level of detailing external debt is achieved by breaking it down into domestic and foreign currenciesdenominated liabilities. Then data are classified by maturity as short-term (with original maturity of one year or less) and longterm (with original maturity exceeding one year).

# Individual Indicators Highlights

Individual indicators' characteristics under General government, Central bank, Banks, and Other sectors correspond

with these indicators' characteristics set out in the comments to Table 1.6.

# Table 1.6 External Debt of the Russian Federation by Maturity and Financial Instruments

# **General Provisions**

External debt (according to international methodology) as of the reporting date represents an outstanding amount of actual current, and not contingent, liabilities of residents of the Russian Federation to nonresidents which requires payment(s) of principal and/or interest at some point(s) in the future.

Information on external debt of the economy is very important for analyzing its sustainability to external shocks.

Methodological and conceptual basis for external debt statistics is set out in the joint document of a group of international organizations *External Debt Statistics: A Guide for Compilers and Users, 2013* and also in the sixth edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6).

The key characteristic of debt is the obligation of a debtor to make payment of principal and/or interest. Therefore, external debt does not include guarantees, open lines of credit, and other contingent liabilities, financial derivatives, and equity instruments as well. Notable exceptions are preferred shares owned by nonresidents which are classified as an external debt component and are included as debt securities.

External debt data under the international methodology cover the indebtedness of all sectors of the economy of the Russian Federation to nonresidents, irrespective of the currency of the debt's denomination.

The Table's structure suggests the following institutional sectors as the main classification groupings:

- General government;
- Central bank;
- Banks (excluding debt liabilities to direct investors and direct investment enterprises);
- Other sectors (excluding debt liabilities to direct investors and direct investment enterprises).

Debt liabilities to direct investors and direct investment enterprises of *Banks* and *Other sectors* are grouped separately.

Further level of detailing external debt is achieved by breaking it down by maturity as short-term (with original maturity of one year or less) and long-term (with original maturity exceeding one year).

Then data are classified by type of debt instruments (debt securities, loans, trade credits, current accounts and deposits, other debt liabilities).

Information sources include reports from Russia's Ministry of Finance, Federal Customs Service, other ministries and agencies, local governments, credit institutions, noncredit financial corporations, nonfinancial corporations, depositaries, data of international financial organizations, and own data (and estimates) of the Bank of Russia.

Data for previous reporting dates are subject to revision, mainly due to the following reasons: corrections in the reported data, availability of data from new sources of information, improvements of methodology and/or compilation techniques of certain components, reclassification of instruments (indicators).

External debt statistics of the Russian Federation are available on the official Bank of Russia website and published in *the Bank of Russia Bulletin.* 

## Individual Indicators Highlights

**General government.** This category includes external indebtedness of the Federal government which has originated in the period since 1992, i.e. the new Russian debt, and indebtedness which had been contracted prior to 1992 and was assumed by Russia after the breakup of the USSR, i.e. the debt of the former USSR, and also the indebtedness of local

governments to nonresidents under contracted credits and issued debt securities.

The new Russian debt includes drawings from IBRD, EBRD, other international organizations and governments of foreign states, indebtedness to nonresidents under all sovereign Eurobonds issued by the Government of the Russian Federation, and also the debt to the London Club creditors. Other liabilities include external debt under current transactions.

The debt of the former USSR includes borrowings from former socialist countries and other official creditor countries as well as the remaining liabilities under merchandise supplies' credits and interest on arrears which are classified as other liabilities.

**Debt** securities. This aggregate contains data on indebtedness to nonresidents on securities issued by Russia's Ministry of Finance and local governments in foreign currencies and in rubles. Government securities are estimated at face value.

**Loans** include data on indebtedness under loans drawn from nonresidents by the Federal government, local governments, and the Government of the former USSR.

**Other liabilities** include the indebtedness under current transactions of Russia's Ministry of Finance, interstate indebtedness under clearing arrangements, and also the remaining liabilities under merchandise supplies' credits and interest on arrears which are classified as other indebtedness.

**Central bank.** This category includes external debt liabilities of the Bank of Russia.

**Loans** include data on the Bank of Russia's indebtedness to nonresidents under securities' repurchase transactions conducted without change of ownership (direct repo).

<u>Currency and deposits.</u> The aggregate includes indebtedness of the Bank of Russia to nonresidents on current accounts, and also the Bank of Russia's estimate of nonresidents' cumulative holdings of cash Russian rubles (commentary to compilation of this component is available on the official Bank of Russia website under directory Statistics. IMF Special Data Dissemination Standard. Metadata).

**<u>Other liabilities</u>** represent liabilities which have accumulated in the course of SDR allocations made by the IMF.

Banks (excluding debt liabilities to direct investors and to direct investment enterprises). Data include liabilities to nonresidents of credit institutions (except nonbank credit institutions which are covered within Other sectors) and Vnesheconombank (for the part of its commercial activity). External indebtedness under state credits, which is maintained on the books of Vnesheconombank due to its fulfillment of the functions of the official agent of the Government of the Russian Federation, is included in liabilities of General government.

**Debt securities** represent indebtedness to nonresidents on debt securities issued by banks. For debt securities' valuation both market value and nominal value are used.

**Loans** include funds drawn by banks from nonresidents that are not banks, under securities' repurchase agreements conducted without change of ownership (direct repo).

<u>Current accounts and deposits</u> represent banks' indebtedness to nonresidents on current accounts, short-term and long-term deposits, and other borrowed funds drawn from nonresident banks.

**Other liabilities** represent indebtedness to nonresidents on declared dividends payable on common and preferred shares which are classified as portfolio investment, and indebtedness which originated as a result of a transfer of claims by resident to nonresident.

Other sectors (excluding debt liabilities to direct investors and to direct investment enterprises). This category contains data on external funds' drawings with detailed liabilities of other (nonbank) financial corporations and liabilities of nonfinancial corporations, households and NPISHs.

**Loans** include indebtedness under credits received from nonresidents including under direct repos and financial leases.

**Debt securities** represent indebtedness to nonresidents on debt securities issued by nonfinancial corporations and other (nonbank) financial corporations. Securities are estimated at market value. They include bonds, notes, nonvoting preferred

Banks' and Other sectors' debt liabilities to direct investors and direct investment enterprises. The item includes debt liabilities vis-a-vis nonresidents associated with banks and corporations within the framework of direct investment relationship, and also indebtedness on declared dividends payable to foreign direct investors.

# Table 1.7 International Investment Position of the Russian Federation. Main Components Table 1.8 International Investment Position of the Russian Federation for the Third Quarter of 2021

# **General Provisions**

International investment position is a statistical statement that shows at a point in time the value and composition of (1) financial assets of residents of the Russian Federation representing claims on nonresidents and gold bullion held as reserve assets, and of (2) liabilities to nonresidents of the residents of the Russian Federation. In the international investment position reflected are: changes that have occurred in the reporting period resulting from financial transactions, valuation changes (revaluation), and other changes. The difference between external financial assets and liabilities is the net international investment position which may be positive indicating that the Russian Federation is a net creditor to the rest of the world - or negative - indicating that the Russian Federation is a net borrower.

Information presented in the international investment position is very important for the analysis of the economic situation of the Russian Federation.

International investment position is compiled and disseminated quarterly. Methodological basis for compilation of the components of the Table is set out in the sixth edition of the IMF's *Balance of Payments and International Investment Position Manual (BPM6).* 

Information sources include reports from Russia's Ministry of Finance, Federal Customs Service, other ministries and agencies, international financial organizations, local governments, credit institutions, noncredit financial corporations, nonfinancial corporations, partner countries' data, as well as own data and estimation system of the Bank of Russia.

International investment position data for previous periods are subject to revision, mainly due to the following reasons: changes in the reported data, availability of data from new sources of information, improvements of methodology and/or compilation techniques of certain components, reclassification of instruments (indicators).

International investment position statistics of the Russian Federation are published in *the Bank of Russia Bulletin*, and also are available on the official Bank of Russia website.

#### Individual Indicators Highlights

Foreign financial assets and liabilities of residents of the Russian Federation are the major classification groupings presented **on the left of the Table.** 

Further breakdown of assets and liabilities is made as follows:

- by functional category (direct investment, portfolio investment, financial derivatives, other investment, international reserves (reserve assets);
- by type of financial instrument (equity and investment fund shares, debt instruments including debt securities, currency and deposits, loans, insurance, pension and standardized guarantee schemes, trade credit and advances, etc.), other accounts receivable/payable;
- by institutional sector (central bank, deposit-taking corporations, general government, other sectors with further breakdown by (1) nonfinancial corporations, households, and nonprofit institutions serving households (NPISHs) and (2) other financial corporations;
- by maturity (for debt instruments) as short-term instruments with original maturity of one year or less, and as long-term instruments with original maturity exceeding one year.

Data on stocks of external assets and liabilities of Russian residents as of the beginning and as of the end of the reporting period, and also data on changes which have occurred in the reporting period are presented **on the top of the Table** as follows:

**Changes arising from transactions** show those net changes in foreign assets/liabilities which have occurred as a result of financial transactions with the respective assets/liabilities. Such transactions are reflected in the Financial Account of the balance of payments of the Russian Federation.

**Changes due to revaluation and other changes** reflect changes (on net basis) which are not related to financial transactions. *Changes due to revaluation* include net changes in volume of assets/*liabilities* due to exchange rate changes and price changes of financial instruments. *Other changes* include all other changes in the volume of assets/*liabilities* (e.g. change of functional category from portfolio investment to direct investment resulting from an increase of investor's share in the direct investment enterprise's equity; unilateral debt write-off by a creditor; other changes).

Other changes cover assets and liabilities of credit institutions whose banking licenses have been revoked in the reporting period, and also banks' transactions with resident counterparties involving cash foreign currency, debt and equity instruments.

#### Special Valuation Cases

External assets and liabilities are valued primarily at market prices.

Debt securities' stocks including securities issued by the general government sector are valued taking into account the accrued coupon interest.

Data on accrued balances under *Loans* (with respect to all sectors except banks) and also those under *Trade credit* and advances are reflected at amortized values.

Monetary gold is valued at the current price quotations set by the Bank of Russia.

## Table 1.9

# International Investment Position of the Banking Sector of the Russian Federation

# **General Provisions**

International investment position (IIP) of the banking sector, as a subset of IIP of the Russian Federation, is a statistical statement, which serves to assess the value of stocks of external assets and liabilities of the banking sector of the economy at the beginning and at the end of a reporting period, as well as all changes within the reporting period resulting from transactions, valuation changes (changes due to revaluation), and other adjustments.

IIP of the banking sector is compiled by the Central Bank of the Russian Federation (Bank of Russia). The aggregate data cover external assets' and liabilities' positions of deposit-taking corporations and also include the data of Vnesheconombank (VEB).

International investment position is compiled and disseminated on a quarterly basis. Integrated IIP statement is compiled on the basis of the methodology set out in the 6th

edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6).

Data sources used for compilation of banking sector IIP are: deposit-taking corporations' direct reports on their foreign transactions and VEB data. International investment position of the banking sector data are important for analysis of financial sustainability of this institutional sector and soundness of the economy, as a whole.

Assets part of the table contains data on the amount of foreign claims held by banking sector at the beginning and at the end of a reporting period, claims structure, maturities and level of liquidity. The available data enable identifying major factors that have caused changes in assets within the reporting period including flows arising from transactions, revaluation and other volume changes.

**Liabilities** part of the table shows the amount of foreign liabilities accumulated by banking sector at the beginning and at the end of a reporting period, their structure and maturities, as well as changes in liabilities within the reporting period including flows arising from transactions, revaluation and other volume changes.

Depending on whether the IIP of the banking sector is positive or negative, this institutional sector may be regarded as a "net creditor" or a "net debtor" vis-a-vis the rest of the world.

Integrated IIP statements of the banking sector for previous reporting periods are subject to revisions due to primary reports' reviews, introduction of new data sources, improvement of methodology and estimation models, as well as instrument reclassification.

Integrated IIP statement of the banking sector is available on the official website of the Bank of Russia.

# Individual Indicators Highlights

The major classification groups presented in the **table rows** are detailed foreign assets and liabilities of the banking sector at a specific date. The difference between foreign assets and liabilities represents net international investment position. The components of the table are identical to those in the IIP of the Russian Federation, i.e. direct investment, portfolio investment, financial derivatives, and other investment.

**Table columns** reflect positions of foreign assets/liabilities of the banking sector at the beginning and at the end of the reporting period, as well as changes in foreign assets/liabilities in the following breakdown.

**Changes in position due to transactions** represent only net changes in the foreign assets/liabilities in the IIP resulting from financial transactions with nonresidents with those financial assets/liabilities. The transactions are recorded in the financial account of the balance of payments.

Valuation changes and other adjustments reflect changes (on a net basis), which are not regarded as transactions and, therefore, not included in the balance of payments. Valuation changes cover net changes in assets/liabilities arising from exchange rates' fluctuations and price changes. Other changes include transactions of resident deposit-taking corporations with resident counterparties with foreign currency, debt securities and equity, as well as all other changes in assets/liabilities (on a net basis) caused by: reclassification (e.g. reclassification from portfolio to direct investment resulting from an increase of an investor's share in the direct investment enterprise equity, a rise in arrears, and etc.), unilateral write-off of debt by a creditor and other volume changes. Other adjustments include, among other, assets and liabilities of deposit-taking corporations whose banking licenses have been revoked within the reporting period.

**Total changes** are an aggregate amount of net changes in assets/liabilities due to transactions, revaluation and other volume changes.

#### Specific Valuation of Indicators

Debt and equity securities are recorded at current fair value including accrued interest; loans and other accounts receivable/ payable – at nominal value.

# Table 1.10 International Reserves of the Russian Federation

# **General Provisions**

A country's international reserves (reserve assets) are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in foreing exchange markets to affect the currency exchange rate, and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing). Reserve assets must be foreign currency assets and assets that actually exist. International reserves should be assets of high quality.

The international reserves of the Russian Federation are highly liquid external assets that are readily available to the Bank of Russia and the Government of the Russian Federation.

Data are compiled on the basis of definitions contained in the 6th edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6), and the IMF's International Reserves and Foreign Currency Liquidity: Guidelines for a Data Template (2012).

Transactions are recorded as of the value date with interest accrued.

Values are converted to US dollars using official exchange rates of foreign currencies in terms of the Russian ruble and gold reference prices set by the Bank of Russia and effective on the reporting date.

The Bank of Russia regularly publishes the data on the stock and the structure of international reserves, the estimations of its predetermined drains and also the metadata on the Bank of Russia's website, in the Bank of *Russia Statistical Bulletin* and the *Bank of Russia Bulletin*. There are also quarterly published data on the IIP, disclosing the international reserves changes: transactions recorded in the balance of payment, exchange rate and other price changes.

# Individual Indicators Highlights

The international reserves consist of foreign exchange, SDR holdings, reserve position in the IMF and monetary gold.

**Foreign exchange** includes foreign currency; balances on nostro corresponding accounts including unallocated gold accounts; deposits with the initial maturity of up to 1 year including gold deposits, with foreign central banks, the Bank for International Settlements (BIS) and nonresident deposit-taking corporations; debt securities issued by nonresidents; loans extended under reverse repo agreements, and other financial claims on nonresidents with the initial maturity of up to 1 year.

Securities received as collateral under reverse repos or under securities' lending agreements (received in exchange for other securities), are not included in international reserves. Securities provided to counterparties under securities' lending transactions are recorded in international reserves, whereas securities that serve as collateral under repurchase agreements are excluded therefrom.

Part of resources on accounts of the Reserve Fund and of the National Wealth Fund of the Russian Federation which is denominated in foreign exchange, deposited with the Bank of Russia and further invested by the Bank of Russia in foreign financial assets is included in the international reserves of the Russian Federation.

Foreign exchange-denominated claims of the Bank of Russia and the Government of the Russian Federation on residents are not included in the international reserves of the Russian Federation.

**Special drawing rights (SDRs)** are international reserve assets created by the IMF and allocated to members; included are balances of SDR holdings on the account of the Russian Federation in the Fund's SDR Department.

**Reserve position in the IMF** is the sum of the reserve tranche position (representing foreign exchange component of the quota of the Russian Federation in the Fund) and the country's claims on the IMF arising from lending under the New Arrangements to Borrow.

**Monetary gold** is defined as standard gold bars and coins with a purity of at least 995/1,000 held by the Bank of Russia and the Government of the Russian Federation. It comprises gold in vault, en route and in allocated accounts, including those that are held abroad.

# Table 1.11 International Reserves Adequacy (International Reserves in Months of Import)

## **General Provisions**

Reserves adequacy is determined by comparison of the actual amount of the international reserves in months of imports of goods and services and the international benchmark reserves adequacy.

# Individual Indicators Highlights

The international benchmark reserves adequacy is equal to three months.

The actual amount of international reserves in months of imports is calculated as the ratio of the amount of international reserves of the Russian Federation at the end of a reporting quarter to the average monthly import of goods and services for the last four quarters.

For example, the actual amount of the international reserves in months of imports for the first quarter of 2016 will be the ratio of the amount of the international reserves of the Russian Federation on April 1, 2016 to the average monthly import of goods and services for the period Q2–Q4 2015 – Q1 2016.

The indicator is disclosed on a quarterly basis no later than four months after the end of the reporting quarter.

# Central Bank Survey, Credit Institutions Survey, Banking System Survey, Other Financial Institutions Survey, Financial Sector Survey

Central Bank Survey, Credit Institutions Survey, Banking System Survey, Other Financial Institutions Survey, Financial Sector Survey are compiled in accordance with the international statistical standards on macroeconomic indicators (Monetary and Financial Statistics Manual (IMF, 2000), Monetary and Financial Statistics Manual and Compilation Guide (IMF, 2016)) under which monetary indicators are presented across financial instruments and economy sectors in rubles and foreign currency.

This data presentation is applicable for an analysis of money supply and its structure, and the relationships of financial intermediaries with other sectors of the Russian economy also as with nonresidents.

The "Central Bank Survey," "Credit Institutions Survey" and "Banking System Survey" are published by the Bank of Russia on a monthly basis while the "Other Financial Institutions Survey" and "Financial Sector Survey" are published quarterly.

Data can be updated in the course of quarter (final data for December can be updated in the course of half a year). The final data are published in the Bank of Russia's monthly Bank of Russia Statistical Bulletin.

# Table 1.12 Central Bank Survey

# **General Provisions**

The sources of information to compile the Central Bank Survey are the Bank of Russia's balance sheet, the invoices

breakdown of the Bank of Russia's aggregated balance sheet, the data on international reserves of the Russian Federation, nonreserve assets and liabilities, monetary authorities' foreign assets and liabilities structure, public corporations deposits, budgetary funds in organizations — indirect recipients of budget, shares on market value, credit institutions liabilities on repurchase agreement, finance relationship with the International Monetary Fund.

**Debt securities included in broad money** comprise funds held by the Russian Federation residents (legal entities and households) in certificates of deposit and saving certificates issued by credit institutions.

**Other items (net)** comprise assets and liabilities which are not included in the above mentioned aggregates. **Escrow accounts of households** comprise funds for the contracts for participation in shared-equity construction and for purchases of real estate.

# Table 1.14 Banking System Survey

# **General Provisions**

The table presents results of the consolidated data of the banking system (see "Central Bank Survey" and "Credit Institutions Survey"). The consolidation is made by subtracting the intersectoral claims and liabilities between credit institutions and the Bank of Russia and summing up their operations with other sectors of the economy and nonresidents.

# Individual Indicators Highlights

**Net foreign assets** comprise assets and liabilities transactions made by monetary authorities and credit institutions with nonresidents in national and foreign currency and precious metals.

**Net claims on general government** represent the banking system's claims on the Russian Federation government, fiscal authorities of the Russian Federation constituent entities and local authorities, government extrabudgetary funds and other extrabudgetary funds less the banking system's liabilities to general government.

**Claims on other sectors** include claims of banking system institutions on other financial institutions and nonfinancial organizations and claims on households in national and foreign currency. The only instrument marked out among total amount of claims on other sectors is loans.

**Claims on other financial institutions and nonfinancial organizations** comprise credits (including arrears and overdue interest) extended by the banking system to other financial institutions and nonfinancial organizations in national and foreign currency, investments in securities of other financial institutions and nonfinancial organizations and other accounts receivable of mentioned organizations.

**Claims on households** comprise credits (including arrears and overdue interest) extended by the banking system to individuals and individual entrepreneurs in the national and foreign currency.

**Broad money liabilities**<sup>1</sup> include currency outside the banking system and deposits of the Russian Federation residents (organizations and individuals) in rubles and foreign currency classified by the level of liquidity as transferable deposits (comprising funds that can be immediately used as means of payment), and other deposits (comprising resident organizations' deposits that are not directly used as means of payment), and also debt securities such as certificates of deposit and saving certificates issued by credit institutions.

**Money supply (national definition)** includes all cash and deposits of the RF resident other financial (except for credit ones) institutions and nonfinancial organizations, and the RF resident households with the banking system of the RF in rubles (see comments to the table "Money Supply (National Definition)").

*Currency outside banking system* includes currency issued by the Bank of Russia into circulation less currency holdings (cash vaults) of the Bank of Russia and credit institutions.

Transferable deposits include current and other demand accounts (including bank card payment accounts) opened by the Russian Federation residents (organizations and individuals) with the Bank of Russia and operating credit institutions in national currency.

**Other deposits** include the Russian Federation residents (organizations and individuals) time deposits and other funds in national currency attracted by the Bank of Russia and operating credit institutions, and also all types of deposits in foreign currency, precious metals accounts, and interest accrued.

Data on transferable and other deposits include *deposits* of other financial institutions and nonfinancial organizations and deposits of households.

**Debt securities included in broad money** comprise funds held by the Russian Federation residents (legal entities and households) in certificates of deposit and saving certificates issued by credit institutions.

**Other items (net)** comprise assets and liabilities which are not included in the above mentioned aggregates. **Escrow accounts of households** comprise funds for the contracts for participation in shared-equity construction and for purchases of real estate.

# Table 1.15 Money Supply (National Definition)

#### **General Provisions**

The table contains information on the amount, structure and dynamics of the M2 aggregate, a major monetary aggregate used in elaborating the economic policy and setting quantitative macroeconomic targets. The money supply is defined as the sum total of funds in the Russian Federation currency, intended for use as payment for goods, work and services and for the accumulation of savings by resident nonfinancial organizations and financial institutions (except for credit ones) and households.

The source of information for the calculation of the money supply is data of the monthly consolidated balance sheet of Russian credit institutions and the Bank of Russia consolidated balance sheet (the calculation includes obligations of credit institutions and the Bank of Russia to economic agents), reporting form 0409110 "Breakdowns of certain indicators of the credit institutions activity", report of the management companies "The calculation of market value and net value of assets in which pension savings are invested". In addition to being published in the Bank of Russia Statistical Bulletin, information on the amount, structure and dynamics of the money supply is available on the Bank of Russia's website.

#### Individual Indicators Highlights

**Cash in circulation (MO monetary aggregate)** is the most liquid part of the money supply, accessible for immediate use as a mean of payment. It includes banknotes and coins in circulation (see the indicator "Currency outside banking system" in the table "Banking System Survey").

**M1 monetary aggregate** is a sum of cash in circulation and balances in the domestic currency on current and other demand accounts (including bank card payment accounts) and interest accrued of nonfinancial organizations – residents of the Russian Federation (RF), financial institutions (except for credit ones) – residents of the RF and the RF resident households in rubles.

**Money supply (M2)** is a sum of cash in circulation and balances in the domestic currency on current, other demand accounts (including bank card payment accounts), time deposits and interest accrued of nonfinancial organizations – residents of the RF, financial institutions (except for credit ones) – residents of the RF and the RF resident households. The money supply in the national definition includes all cash and deposits of the RF resident nonfinancial organizations, the RF resident financial institutions (except for credit ones) and the RF resident house-holds with the operating credit institutions – residents of the RF in rubles.

Deposits include transferable deposits and other deposits.

**Transferable deposits** include current and other demand accounts (including bank card payment accounts) and interest accrued of nonfinancial organizations — residents of the RF, fi-

nancial institutions (except for credit ones) — residents of the RF and households — residents of the RF.

**Other deposits** include time deposits and interest accrued of nonfinancial organizations — residents of the RF, financial in-stitutions (except for credit ones) — residents of the RF and households — residents of the RF.

Unlike the indicator "Broad money liabilities" in the table "Banking System Survey", deposits do not include foreign currency deposits.

Monetary aggregate M2 does not include deposits in credit institutions with revoked licences.

# Table 1.16Monetary Base (Broad Definition)

# **General Provisions**

The table presents information on the volume, structure and dynamics of the monetary base. This indicator characterizes the ruble-denominated monetary obligations of the Bank of Russia, which ensure growth in the money supply. The monetary base is not a monetary aggregate but it is used as a basis for creating monetary aggregates, therefore it is also called "high-powered money".

The Monetary Base (the table "Central Bank Survey") is calculated just as the monetary base (broad definition).

The source of information used in calculating the monetary base (broad definition) is data from the Bank of Russia monthly consolidated balance sheet. In addition to the Bank of Russia Statistical Bulletin, data on the volume, structure and dynamics of the monetary base (broad definition) are available on the Bank of Russia's website.

# Individual Indicators Highlights

All elements of the monetary base (broad definition) are calculated in the Russian currency only.

Currency in circulation, including balances in credit institutions' cash vaults – currency in circulation, including balances in credit institutions' cash vaults, excluding cash rubles in Bank of Russia vaults, ATMs and in transit, as well as precious metal coins in circulation.

Correspondent accounts balances of credit institutions with the Bank of Russia are balances of ruble-denominated accounts of the RF resident credit institutions, including an averaged amount of the required reserves (see also comments on the tables 2.3 - 2.5).

**Required reserves** are balances in the required reserve accounts deposited by credit institutions – balances of required reserve accounts deposited by credit institutions with the Bank of Russia on funds raised in rubles and foreign currency (see also comments on the tables 2.3 - 2.5).

**Credit institutions' deposits with the Bank of Russia** – deposits of the RF resident credit institutions with the Bank of Russia in rubles and balances on the other operations of the RF resident credit institutions in rubles with the Bank of Russia.

**Bank of Russia bonds with credit institutions** – market value of the Bank of Russia bonds with credit institutions.

# Table 1.17 Other Financial Institutions Survey (by selected number of financial intermediaries)

#### **General Provisions**

Other Financial Institutions Survey contains data which illustrate the relations between insurance companies, private pension funds, public financial corporations (since December 2012) and other sectors of the economy and nonresidents. The source of information used in compiling Other Financial Institutions Survey is the data of federal statistical forms No. 1 FS (SK) "Insurance Company Borrowings and Investments" and No. 1 FS (NPF) "Private Pension Fund Financial Operations" quarterly reported by insurance companies and private pension funds to the Bank of Russia and the quarterly data of public financial corporations (since December 2012).

## Individual Indicators Highlights

**Net foreign assets** – netting all transactions in assets and liabilities made by insurance companies, private pension funds and public financial corporations with nonresidents.

**Claims on nonresidents** – all transactions in assets made by insurance companies, private pension funds and public financial corporations with nonresidents: foreign currency and deposits – cash in foreign currency held by insurance companies and private pension funds and deposits with nonresident banks; securities other than shares – investments by insurance companies, private pension funds and public financial corporations in debt securities, credits and loans – loans extended to nonresidents; other claims on nonresidents – other operations, including investments in shares issued by nonresidents, premium deposit for reinsurance reserves and other accounts receivable from nonresidents.

**Liabilities to nonresidents** include all transactions in liabilities made by insurance companies, private pension funds and public financial corporations with nonresidents: credits and loans — credits and loans received by insurance companies, private pension funds and public financial corporations from nonresidents; other liabilities to nonresidents — other liabilities of insurance companies, private pension funds and public financial corporations, including insurance reserves formed under insurance and reinsurance agreements with nonresidents and debt on reinsurance operations with nonresidents.

**Claims on banking system** include cash — cash in the currency of the Russian Federation held by insurance companies, private pension funds and public financial corporations; other instruments — funds on current accounts, deposits and other accounts with credit institutions, investments in the shares and debt securities of credit institutions, investments in certificates of deposit, and also loans extended to credit institutions.

**Net claims on general government** include claims of insurance companies, private pension funds and public financial corporations on the Russian Federation government, constituent entities and local authorities, government and other extrabudgetary funds less the liabilities of insurance companies, private pension funds and public financial corporations to general government.

**Claims on general government** include insurance companies, private pension funds and public financial corporations' investments in the securities of the government of the Russian Federation, the Russian Federation constituent entities and local authorities.

**Liabilities to general government** include insurance reserves formed under agreements with government of the Russian Federation, the Russian Federation constituent entities and local authorities, and loans extended to insurance companies by general government.

**Claims on other sectors** – claims of insurance companies, private pension funds and public financial corporations on other groups of financial institutions, nonfinancial organizations and households.

**Claims on other financial institutions** include insurance companies, private pension funds and public financial corporations' investments in debt securities and shares of other financial institutions, except for insurance companies, private pension funds and public financial corporations, settlement accounts with asset management companies, investments in mutual funds shares and loans extended to other financial institutions, except for insurance companies, private pension funds and public financial corporations.

**Claims on nonfinancial organizations** include insurance companies, private pension funds and public financial corporations' investments in debt securities and shares issued by nonfinancial organizations and loans extended to nonfinancial organizations.

**Claims on households** include loans extended by insurance companies, private pension funds and public financial corporations to households.

**Securities other than shares** comprise bonds and bills issued by insurance companies and public financial corporations.

**Loans** include credits and loans received by insurance companies, private pension funds and public financial corporations from credit institutions, other financial institutions, nonfinancial organizations and households.

**Insurance technical reserves** comprise insurance reserves of insurance companies, public financial corporations, accumulated to cover the claims of resident policyholders: under life insurance agreements with households, under non-life insurance agreements with credit institutions, other financial institutions, except for insurance companies and private pension funds, with nonfinancial organizations and households and funds of private pension funds accumulated to cover the claims of participants in pension plans under agreements on private pension provision, agreements on compulsory pension insurance and agreements on creating a professional pension system.

The survey gives data on net equity of households in life insurance reserves, net equity of households in pension funds reserves, prepaid premiums and reserves for outstanding claims. Net equity of households in life insurance reserves is technical provisions insurance companies' reserves formed against outstanding risks under life insurance agreements. Net equity of households in pension funds reserves comprises pension accruals and reserve for pension plan liabilities accumulated as part of pension reserves of pension funds. Prepaid premiums and reserves for outstanding claims include the insurance payments of credit institutions under deposit agreements with households, the amounts of unearned premium reserves and loss reserves formed for covering claims under non-life insurance agreements with residents and the amount of compulsory medical insurance reserves.

# Table 2.2 The Bank of Russia Key Rate<sup>1</sup>

# **General Provisions**

The Bank of Russia key rate (hereinafter, the key rate) is an interest rate for the Bank of Russia to influence interest rates in the economy, which are optimal given the situation for achieving the inflation target. The key rate is set by the Bank of Russia Board of Directors. The key rate equals the minimum/ maximum rate on Bank of Russia operations to regulate banking sector liquidity (one-week auctions to provide and absorb ruble liquidity). It is also the centre of the Bank of Russia's interest rate corridor bounding the fluctuations of overnight interbank rates.

<sup>&</sup>lt;sup>1</sup> Starting from 1 January 2016, the key rate is applied to the relations regulated by normative legal acts of the Government of the Russian Federation instead of the Bank of Russia refinancing rate, unless otherwise indicated by federal law (Resolution of the Government of the Russian Federation No. 1340, dated 8 December 2015).

# Credit Institutions in Their Correspondent Accounts (Subaccounts) with the Bank of Russia

# **General Provisions**

The table "Required reserve ratios" shows changes in the ratios for required reserves for credit institutions' liabilities in Russian rubles and foreign currency.

The table "Required reserve averaging ratios set by the Bank of Russia" presents changes in the required reserve averaging ratios.

The table "Adjustment ratios for reservable liabilities and required reserves" shows changes in the adjustment ratios for reservable liabilities and required reserves.

The table "Required reserves (averaged amount) held by credit institutions in their correspondent accounts (subaccounts) with the Bank of Russia" presents changes in the amount of required reserves maintained by credit institutions in correspondent accounts (sub-accounts). The said amount is included in the item "Credit institutions' correspondent accounts with the Bank of Russia" in the table "Broad money".

Data on the required reserve ratios and averaging ratios and their changes according to decisions made by the Bank of Russia Board of Directors are published in the Bank of Russia Bulletin. This information is also available on the Bank of Russia website and communicated through Reuters and the Bloomberg information system.

# Individual Indicators Highlights

**Required reserves (required reserve ratios, required reserve averaging ratio)** are a basic instrument of the Bank of Russia's monetary policy. Information on the amount of required reserves is published in the Bank of Russia Bulletin and on the Bank of Russia website.

**The required reserve ratios** determine the amount of required reserves as a percentage of a credit institution's liabilities.

**The averaging ratio** is a numerical factor ranging from 0 to 1, which is used to calculate the averaged amount of required reserves.

According to Article 38 of the Federal Law "On the Central Bank of the Russian Federation (Bank of Russia)", the amount of required reserves (required reserve ratio, required reserve averaging ratio) and the procedure for credit institutions' fulfilment of the reserve requirements, including the procedure for depositing required reserves with the Bank of Russia, are established by the Bank of Russia Board of Directors.

A credit institution deposits required reserves with the Bank of Russia by transferring them into the required reserve account opened with the Bank of Russia, and/or fulfilling the required reserve averaging obligation, that is, by maintaining the average amount of required reserves in the correspondent account and sub-accounts opened with the Bank of Russia.

In the case where a credit institution's banking licence is revoked, the required reserves deposited by the credit institution with the Bank of Russia are used in accordance with the procedure stipulated by federal laws and related Bank of Russia regulations.

**The adjustment ratio** is a numerical factor ranging from 0 to 1, which is established by the Bank of Russia Board of Directors for determining the amount of a credit institution's liabilities to other resident credit institutions under issued debt securities to be excluded from reservable liabilities.

The ratios on operations involving a credit institution – central counterparty are numerical factors ranging from 0 to 1, which are established by the Bank of Russia Board of Directors for determining the amounts of a credit institution's liabilities in Russian rubles and foreign currency that arise within repo and deposit operations between clearing participants involving a credit institution – central counterparty and are subject to be included in reservable liabilities pursuant to Bank of Russia Regulation No. 753-P, dated 11 January 2021, "On Credit Institutions' Required Reserves" (effective since 1 April 2022).

The adjustment of required reserves for a credit institution's vault cash is to determine the value of cash in Russian rubles in the credit institution's vault to be excluded from the calculation of the regulatory amount of required reserves.

# Table 2.7 Interest Rates on Monetary Policy Instruments of the Bank of Russia

# General Provisions

The table presents the dynamics of interest rates on monetary policy instruments set by the Bank of Russia Board of Directors to achieve the operational goal of monetary policy, which is to keep overnight interbank rates close to the key rate.

Interest rates on monetary policy instruments are tied to the key rate in per cent per annum.

The Bank of Russia Board of Directors sets maximum rates submitted at main deposit auctions and fine-tuning deposit auctions as well as minimum rates submitted at main repo auctions and fine-tuning repo auctions at the key rate level. Interest rates on funds extended or attracted at these auctions are fixed (they do not change if the key rate changes).

Interest rates on overnight standing facilities form the Bank of Russia interest rate corridor which helps restrict the volatility of overnight interbank rates and keep them closer to the key rate. The Bank of Russia forms its interest rate corridor symmetrically relative to the key rate by setting interest rates on overnight standing deposit facilities at 100 bp above the key rate, and the interest rate on standing overnight deposit facilities at 100 bp below the key rate.

Bank of Russia standing liquidity provision facilities include such repayable operations that are conducted automatically or at a request of a credit institution in the full amount and at a predetermined interest rate or at a predetermined spread to the key rate. Credit institutions can access these instruments every day.

The Bank of Russia Board of Directors sets minimum rates submitted at loan auctions, which are conducted if there is a significant and sustained structural deficit of liquidity, at 25 bp above the key rate. These rates are floating, i.e. interest rates on previously issued loans follow changes in the key rate (with a fixed spread determined at auction).

The Bank of Russia Board of Directors sets minimum rates submitted at 1-month repo auctions at 10 bp above the key rate and at 1-year repo auctions — at 25 bp above the key rate. Interest rates on 1-month repos are fixed, i.e. they do not change if the key rate changes, while those on 1-year repos are floating, i.e. they follow changes in the key rate (with a fixed spread determined at auction).

Since 1 March 2022 the interest rates on standing lending facilities for 2 to 90 days are set by the Bank of Russia Board of Directors at 100 bp above the key rate and those for more than 90 days — at 175 bp above the key rate. These rates are floating, i.e. interest rates on previously issued loans follow changes in the key rate.

# Individual Indicators Highlights

Interest rate on standing deposit facilities – currently, this is the interest rate on standing overnight deposit facilities that represents the lower bound of the interest rate corridor and is set by the Bank of Russia Board of Directors at 100 bp below the key rate. Up to and including 2 March 2019, this was also the interest rate on standard "tom-next", "spot-next" and "on demand" standing deposit facilities.

Maximum rate submitted at deposit auctions is the highest interest rate that can be submitted by deposit auction

participants. As per decisions of the Bank of Russia Board of Directors, maximum interest rates submitted at main deposit auctions (1 week) and at fine-tuning deposit auctions are tied to the key rate.

**Minimum rate submitted at repo auctions** is the lowest interest rate that can be submitted by repo auction participants. As per decisions of the Bank of Russia Board of Directors, minimum interest rates submitted at main repo auctions (1 week) and at fine-tuning repo auctions are tied to the key rate while minimum interest rates submitted at 1-month repo auctions are set at 10 bp above the key rate and those at 1-year repo auctions – at 25 bp above the key rate.

*Minimum rate submitted at loan auctions (non-marketable assets)* is the lowest interest rate that can be submitted by participants at auctions to provide loans secured by non-marketable assets. As per the decisions of the Bank of Russia Board of Directors, this rate is set at 25 bp above the key rate.

Interest rate on standing overnight loans, repos and *FX swaps* is the single interest rate on all overnight standing liquidity provision facilities, including overnight loans, lombard loans, loans secured by non-marketable assets, repo and FX swap operations. This rate represents the upper bound of the interest rate corridor and is set by the Bank of Russia Board of Directors at 100 bp above the key rate.

The interest rate on the "ruble part" of the Bank of Russia's USD/RUB and EUR/RUB buy/sell FX swaps is provided. From 18 June 2012 to 22 December 2016, the interest rate on the "foreign currency part" of these operations was equal to zero, and from 23 December 2016 to 31 December 2021, it was equal to overnight LIBOR rates on loans in US dollars or euros. According to the decision of the Bank of Russia Board of Directors, since 1 January 2022 the interest rate on US dollars is equal to the SOFR and that on euros – to the €STR.

Also, the interest rate on overnight loans secured by gold up to and including 15 July 2017 and the interest rate on overnight loans secured by sureties of credit institutions up to and including 30 September 2018. Due to changes in external economic conditions, the Bank of Russia suspended FX swap operations.

Interest rate on lombard loans and loans secured by nonmarketable assets for 2 to 90 days is the interest rate on standing lending facilities secured by non-marketable assets, and since 25 March 2022 the rate on lombard loan facilities for 2 to 90 days set by the Bank of Russia Board of Directors at 100 bp above the key rate.

Interest rate on standing lending facilities secured by non-marketable assets for more than 90 days is the interest rate on standing lending facilities secured by non-marketable assets for 91 to 549 days set by the Bank of Russia Board of Directors at 175 bp above the key rate.

# Table 2.8 Interest Rates on the Bank of Russia's Special Facilities

# **General Provisions**

The table shows the dynamics of interest rates (% per annum) on loans extended within special facilities of the Bank of Russia. These interest rates were established in accordance with the rules approved by the Bank of Russia Board of Directors. There are interest rates at which new loans are granted since the specified date or new loans could be granted if their provision had not been suspended or discontinued. The special facilities of the Bank of Russia are aiming to incentivise credit institutions to grant loans to top-priority industries and economic sectors.

# Individual Indicators Highlights

**SME Support** — the interest rate on Bank of Russia loans secured by guarantees of JSC Russian Small and Medium Business Corporation and on unsecured loans granted to support lending to small and medium-sized enterprises in 2022 (provision from 11 March to 30 December 2022). Also, up to and including 14 March 2022, the interest rate on Bank of Russia loans secured by credit claims of JSC SME Bank on credit institutions, microfinance organisations or leasing companies for lending or on ceding property to SMEs (since 23 August 2021 the provision of loans has been discontinued).

**Non-Commodity Export Support (EXIAR)** – the interest rate on loans secured by credit claims on agreements backed by insurance contracts of JSC Russian Agency for Export Credit and Investment Insurance (EXIAR).

## Individual Indicators Highlights

**Auction date** is the day when a long-term repo auction is held and its results are announced.

**Date of the first leg** is the day when funds are transferred under repo transactions to the credit institutions whose orders were satisfied at auction; usually, the next business day after the auction date.

**Date of the second leg** is the day when credit institutions are to repay the funds to the Bank of Russia under repo transactions.

**Weighted average rate** is the average interest rate calculated as a result of the auction on funds provided under REPO transactions and weighted by the amount of satisfied orders, in per cent per annum.

**Amount of extended funds** is the amount of funds to be transferred to credit institutions as a result of the auction (this indicator is not adjusted if the amount of actually transferred funds differs due to failure to execute deals), in billions of rubles.

# Table 2.12

# Results of Bank of Russia Fine-Tuning Auctions

# **General Provisions**

The table contains information for the last full calendar month on the results of Bank of Russia fine-tuning auctions. The Bank of Russia holds fine-tuning auctions to prevent substantial fluctuations of interest rates on overnight interbank loans in case of an imbalance of supply and demand for liquidity in the money market. The Bank of Russia holds repo auctions if supply exceeds demand, and deposit auctions if demand exceeds supply. If necessary, the Bank of Russia holds finetuning auctions between main weekly actions. This means that funds at fine-tuning auctions are provided or attracted for shorter periods (usually, no longer than for 6 calendar days).

# Individual Indicators Highlights

**Auction date** is the day when a fine-tuning auction is held and its results are announced; also the day when the Bank of Russia provides funds to credit institutions in the case of a repo auction or when credit institutions transfer funds to deposit accounts in the case of a deposit auction.

**Auction type** is the type of the fine-tuning auction held: a repo auction or a deposit auction.

**Maturity** is the number of days for which the Bank of Russia provided funds in the case of a repo auction or credit institutions transferred funds to deposit accounts in the case of a deposit auction.

**Weighted average rate** is the average interest rate calculated as a result of the auction and weighted by the amount of satisfied orders, in per cent per annum.

**Amount** is the amount of funds to be transferred by the Bank of Russia through entering into repo transactions as a result of a repo auction or to be transferred by credit institutions to deposit accounts as a result of a deposit auction (this indicator is not adjusted if the amount of actually provided or attracted funds differs due to failure to execute deals), billions of rubles.

# Table 2.13 Results of Bank of Russia Long-Term Repo Auctions

#### **General Provisions**

The table contains information for the last three full calendar months on the results of Bank of Russia 1-month and 1-year repo auctions. The Bank of Russia holds these auctions monthly in line with an approved schedule.

# Individual Indicators Highlights

**Auction date** is the day when a long-term repo auction is held and its results are announced.

**Date of the first leg** is the day when funds are transferred under repo transactions to the credit institutions whose orders were satisfied at auction; usually, the next business day after the auction date.

**Date of the second leg** is the day when credit institutions need to repay the funds to the Bank of Russia under the repo transactions.

**Weighted average rate** is the average interest rate calculated as a result of the auction on funds provided under repo transactions and weighted by the amount of satisfied orders, in per cent per annum.

**Amount of extended funds** is the amount of funds to be transferred to credit institutions as a result of the auction (this indicator is not adjusted if the amount of actually transferred funds differs due to failure to execute deals), billions of rubles.

Table 3.1.1 Monthly Average Actual Rates on Moscow Banks' Credits in Rubles (MIACR, MIACR-IG, MIACR-B) Table 3.1.2 Monthly Average Actual Rates on Moscow Banks' Credits in US Dollars (MIACR USD) Table 3.1.3 Weighted Average Actual Rates on Moscow Banks' Credits in Rubles (MIACR, MIACR-IG, MIACR-B) Table 3.1.4 Weighted Average Actual Rates on Moscow Banks' Credits in US Dollars (MIACR USD)

# **General Provisions**

These tables contain the data on bid and offered rates and interbank lending rates with breakdown by maturity bands (1 day, 2 to 7 days, 8 to 30 days, 31 to 90 days, 91 to 180 days and 181 days to 1 year) in rubles and in US dollars.

The source of data is the daily reporting form 0409701 "The foreign exchange and money markets transactions report" in compliance with the Bank of Russia Ordinance No. 4927-U, dated October 8, 2018, "On the List, Forms and Procedure for Compiling and Presenting Credit Institutions Reporting Forms to the Central Bank of the Russian Federation" presented by the panel banks in the Moscow region.

Information on the interbank money market rates is also published in the weekly Bulletin of the Bank of Russia and on the Bank of Russia's official website.

# Individual Indicators Highlights

Monthly Average Actual Rates on Moscow Banks' Credits (MIACR, MIACR-IG, MIACR-B) are calculated as simple averages of daily MIACR, MIACR-IG and MIACR-B rates for the corresponding period with breakdown by maturity bands.

Weighted Average Actual Rates on Credits (MIACR, MIACR-IG, MIACR-B) are calculated as weighted averages of the interest rates applied to the actual interbank lending transactions conducted by Moscow banks with breakdown by maturity bands. Transactions with maximal rates (10% of overall volume of transactions) and transactions with minimal rates (10% of overall volume of transactions) are excluded from calculation.

Since January 2015 transactions with volume 10 times above the maximum total daily volume of the bank's similar transactions (with regard to maturity and currency) for the latest six months are excluded from calculation of interbank lending rates MIACR, MIACR-IG, MIACR-B. Furthermore, rates and corresponding turnover volumes are not published in case of calculation on the basis of less than three transactions.

Since August 2015 bank's transactions with one counterparty at the similar rate (with regard to maturity and currency) are considered as one transaction for calculation of interbank lending rates MIACR, MIACR-IG, MIACR-B.

Since February 2016 transactions between banks involved in measures aimed at preventing bank bankruptcy and corresponding investor banks are excluded from calculation of interbank lending rates MIACR, MIACR-IG, MIACR-B.

Weighted Average Actual Rates on Moscow banks' credits (MIACR) include rates in lending transactions with resident and non-resident banks.

Weighted Average Actual Rates on Moscow banks' credits to Russian banks with high credit rating (MIACR-IG) include rates in lending transactions with Russian banks with credit rating from Baa3 on Moody's scale or BBB– on Fitch and Standard & Poor's scales and higher.

Weighted Average Actual Rates on Moscow banks' credits to Russian banks with speculative credit rating (MIACR-B) include rates in lending transactions with Russian banks with credit rating from B3 to B1 on Moody's scale or from B– to B+ on Fitch and Standard & Poor's scales.

# Table 3.1.5 Average Daily Turnover of Interbank Lending (Deposits) and REPO Operations Table 3.1.6 Average Daily Interbank Lending (Deposits) Turnover and REPO Operations by Maturity

# General Provisions

These tables are formed on the basis of the daily reporting form 0409701 "The foreign exchange and money markets transactions report" in compliance with the Bank of Russia Ordinance No. 4927-U, dated October 8, 2018, "On the List, Forms and Procedure for Compiling and Presenting Credit Institutions Reporting Forms to the Central Bank of the Russian Federation" presented by the panel banks. The data include average daily interbank credits (deposits) turnover and repo operations with breakdown by maturity bands, instruments and currencies applied in the interbank money market.

Information is also published on the Bank of Russia's official website.

# Individual Indicators Highlights

Interbank lending (deposits) turnover and repo operations include interbank lending transactions and deposits without any collateral or obligations and repo operations, conducted with residents of the Russian Federation (excluding double counting) and non-residents of the Russian Federation (banks and international financial institutions).

Data exclude transactions with the Bank of Russia, ondemand operations, intraday operations, subordinate loans and sindicated loans.

# Subsection 3.2 Exchange Rates and Reference Prices of Precious Metals

# Table 3.2.1 Official Exchange Rate of US Dollar Against Ruble Table 3.2.2 Official Exchange Rate of Euro Against Ruble

#### **General Provisions**

Official exchange rates of foreign currencies against ruble are set and published by the Bank of Russia according to Article 53 of Federal Law "On the Central Bank of Russian Federation (Bank of Russia)".

Data on official exchange rates are disseminated on the day of their setting on the Bank of Russia's website and are published in the *Bank of Russia Bulletin*.

# Individual Indicators Highlights

**Official exchange rate of US dollar against ruble** is calculated and set by the Bank of Russia each business day on the basis of USD/RUB quotations in the domestic interbank foreign exchange market.

**Official exchange rate of euro against ruble** is calculated and set by the Bank of Russia on the basis of the official exchange rate of the US dollar against ruble and EUR/USD quotations in the international interbank foreign exchange market.

# Table 3.2.5

# **Reference Prices of Refined Precious Metals**

# **General Provisions**

To promote further development of the precious metals market in Russia, the Bank of Russia, pursuant to its Ordinance No. 1283-U, dated May 28, 2003, "On the Procedure for Fixing Reference Prices of Refined Precious Metals", sets book prices of precious metals every business day at 2 p.m. Moscow time. They are calculated on the basis of real time spot prices of gold, silver, platinum and palladium from London Fixings and recalculated in rubles at an official US dollar / ruble rate effective on the day following the day on which book prices were fixed.

The table shows daily book prices of above precious metals for the accounting month.

To enable credit institutions to account for precious metals (gold, silver, platinum and palladium), it is established that reference prices of refined gold, silver, platinum and palladium come into effect on the business day following the day on which they were fixed and remain effective until the Bank of Russia sets new reference prices.

Bank of Russia Ordinance No. 1284-U, dated May 28, 2003, "On Invalidating Some Bank of Russia Regulations" repealed Bank of Russia Ordinance No. 652-U, dated September 30, 1999, "On the Procedure for Calculating the Bank of Russia Buying and Selling Prices of Refined Precious Metals in Operations with Credit Institutions" (with amendments), which set the procedure for fixing prices for the Bank of Russia buying and selling precious metals on the domestic market.

Bank of Russia Ordinance No. 1993-U, dated April 9, 2008, "On Amending Point 2 of Bank of Russia Ordinance No. 1283-U, Dated May 28, 2003 on the Procedure for Fixing Reference Prices of Refined Precious Metals", cancelled since July 1, 2008, discounts for fixings equaling "the average cost of delivery of each precious metal to the international market".

The reference prices of precious metals fixed by the Bank of Russia are published in *the Bank of Russia Bulletin*, reported by Interfax, PRIME, Reuters, Associated Press and other news agencies and are available on the Bank of Russia's website.

# Subsection 3.3 Exchange Market

# Table 3.3.1 Trades at the Unified Trading Session of Moscow Exchange

# **General Provisions**

The data describes the US dollar and the euro against the ruble trades at the Unified trading session of the Moscow Exchange. The trading members are Russian credit and noncredit organizations, non-resident banks, other organizations. Trading and settlements are regulated by an rules approved by the authorized body of the Moscow Exchange.

The data are obtained from daily reporting of Moscow Exchange.

# Individual Indicators Highlights

**Weighted average rate** is calculated in accordance with the formula:

$$\bar{r} = \frac{\sum Ri Vi}{\sum Vi}$$
, where

r - weighted average exchange rate;

Ri – weighted average exchange rate of trading session "i";

Vi – trading volume of trading session "i".

 $\ensuremath{\textit{Trading volume}}$  is an aggregate trading volume during the month.

# Table 3.3.2 Foreign Cash Flow Through Authorized Banks Across Russia

# **General Provisions**

The table 'Foreign Cash Flow Through Authorised Banks Across Russia' contains key indicators of foreign cash (all currencies in US dollar terms) circulation in the Russian Federation.

*Number of transactions* — number of foreign cash purchases/sales for cash rubles.

**Monthly average rate** — average rate of foreign cash sales/ purchases defined as a ratio of cash rubles received/paid for foreign cash to the amount of foreign currency purchased/sold for cash rubles from/to residents and nonresidents.

**Average transaction margin** – difference between rates of foreign cash purchase and sale.

Percentage share of a specific foreign currency transaction in total volume of foreign cash transactions by exchange offices — share of purchase/sale transactions for a specific currency (US dollar, Euro) in the total volume of transactions in all foreign currencies.

#### Table 3.3.4

# Average Foreign Cash Purchase and Sale Transactions with Individuals by Authorized Banks

# General Provisions

The table shows purchase and sale transactions with individuals by authorized banks and their branches ranged by an average transaction amount. This differentiates between totals of foreign cash (all currencies in dollar terms) purchases/ sales to/from individuals based on fixed amount intervals for transactions. The information is provided by monthly reporting on foreign cash flows and documentary payments in foreign currency and cheques by credit institutions licensed for foreign currency transactions (authorized banks).

Data are provided by monthly reporting on foreign cash and cheques flows of credit institutions licensed by the Bank of Russia to conduct operations with foreign currency (authorized banks), as well as reporting by authorized bank branches which are permitted to conduct operations with foreign currency.

# Individual Indicators Highlights

**Transactions volume-based distribution** is defined as the ratio of foreign cash purchased/sold to/from residents and nonresidents in cash rubles to a number of foreign exchange transactions in cash rubles reported by each authorized bank's (branch or headquaters for lack of branches). The amount of purchased/sold foreign cash and the number of within-aninterval transactions by all branches or headquarters show the general distribution of an estimated average transaction.

# Table 3.4 Stock Exchange Trade by Types of Securities and Financial Derivatives

# **General Provisions**

The table 'Stock Exchange Trade by Type of Securities and Financial Derivatives' shows volumes of stock exchange trade in securities and financial derivatives (including repos) broken down by type of securities and financial derivatives.

Volumes of trade in futures on securities and futures on stock indices are calculated separately for futures. Volumes of trade in options on futures, an underlying asset of which are securities, and options on futures, an underlying asset of which are stock indices, are calculated separately for options.

# Individual Indicators Highlights

The terms 'share', 'bond', 'investment unit', 'financial derivative', 'futures', and 'option' are defined in line with Federal Law No. 39-FZ, dated April 22, 1996, 'On the Securities Market', Federal Law No. 65-FZ, dated April 22, 2010, 'On Investment Funds', and Bank of Russia Ordinance No. 3565-U, dated February 16, 2015, 'On Types of Financial Derivatives'.

**Share** is an issued security that fixes the rights of its owner (shareholder) to receive part of the profit of a corporation in the form of dividends, to participate in the management of the corporation and to receive part of the property that remains after its liquidation. Shares are inscribed (registered) securities.

**Bond** is an issued security that fixes the right of its holder to receive its nominal value from the bond issuer, in the period of time provided for by such bond, or other property equivalent. A bond may likewise provide for the right of its holder to receive the interest fixed in it, on the nominal value thereof or for other property rights. The income on a bond is interest and/ or discount.

**Russian depositary receipt (RDR)** is a registered security that does not have a par value, confers ownership rights to a certain number of securities (shares or bonds of a foreign issuer (underlying securities) or securities of other foreign issuer certifying the rights to shares or bonds of a foreign issuer) and carries the RDR holder's right to receive from the RDR issuer the relevant number of underlying securities in exchange for the depository receipts and to be provided with services in relation to the exercise of rights attached to the underlying securities by the RDR holder.

**Investment Share (Unit)** is an inscribed security that certifies the right of its holder for a share in the property of a unit investment fund, the right to demand appropriate trust (fiduciary) management of the unit investment fund from its management company, and the right to get cash compensation upon termination of a trust management contract of the unit investment fund with all the holders of its investment shares (termination of the unit investment fund).

This agreement may also provide for the obligation of the parties or a party to the agreement to transfer securities, commodities or

currency to the other party or the obligation to make a contract which is a derivative;

- the obligation of the parties or a party to the agreement under the terms and conditions defined when making it, if the other party makes a claim, to purchase or sell securities, currency or commodities or to make a contract which is a derivative;
- 3) the obligation of the parties or a party to the agreement to transfer the securities, currency or commodities to the other party for ownership at the earliest on the third day after making the agreement and the obligation of the other party thereto to accept and pay for the cited property, and contains an indication that such agreement is a derivative.

**Futures Agreement (Contract)** shall be deemed a contract made in the course of exchange trade which provides for the obligation of either party to the agreement to make periodical monetary payments depending on changes in the price and (or) the value of the underlying asset and (or) the occurrence of the circumstance which constitutes an underlying asset.

**Option Agreement (Contract)** shall be deemed the following:

 an agreement providing for the obligation of either party to the agreement, if a claim is made by the other party, to pay on a periodical basis and (or) as a lump sum amounts of money depending on changes in the price (value) of the underlying asset or occurrence of the circumstance which is deemed to be an underlying asset;

2) an agreement providing for the following:

the obligation of either party to the agreement under the terms and conditions defined when making it, if the other party makes a claim, to purchase or sell the underlying securities, currency or commodity, including by way of making by a party (parties) thereto and (or) by the person (persons) in whose interests the option agreement has been made, a contract of securities purchase and sale, a contract of foreign currency purchase and sale or a contract of commodities delivery; or

the obligation of either party to an agreement, if the other party thereto makes a claim, to make a contract which is a derivate and constitutes an underlying asset.

# Table 3.5 Main Stock Market Indicators

# General Provisions

The table presents data on the MICEX index, the RTS index and the Moscow Exchange trade turnover.

The MICEX index has been calculated since September 22, 1997 (its initial value was set at 100 points) on the basis of ruble stock prices. The sample of stocks included into the calculation basis is the expert evaluation.

The RTS index has been calculated since September 1, 1995 (its initial value was set at 100 points). Stock prices are denominated in US dollars. The sample of stocks used for the RTS index calculation basis is the expert evaluation.

The Moscow Exchange reviews the MICEX and the RTS Indices' List of constituent Stocks four times a year.

# Individual Indicators Highlights

**The Moscow Exchange trade turnover** is the value of transactions with stocks, conducted in secondary trading on the Moscow Exchange in ruble equivalent.

The MICEX Index and the RTS Index are capitalizationweighted composite indices calculated based on prices of 50 most liquid stocks of Russian issuers. Russian depositary receipts (RDRs) also may be included into the indices' Constituent List. The market capitalization contains a share of stocks outstanding in the secondary market (free-float).

More detailed information on the calculation of the above indicators is available at the website http://rts.micex.ru.

# Section 4. Financial Institutions' Performance

Subsection 4.1 General Description

### Table 4.1.1 Quantitative Characteristics of Operating Credit Institutions

### **General Provisions**

The table provides data on the number and structure of credit institutions operating in the Russian Federation.

Credit institutions are subject to state registration pursuant to the Federal Law "On the State Registration of Legal Entities and Individual Entrepreneurs". They are registered according to the procedure established by Articles 4 and 59 of the Federal Law "On the Central Bank of the Russian Federation (the Bank of Russia)" and Article 12 of the Federal Law "On Banks and Banking Activities".

The Bank of Russia makes decisions on state registration of credit institutions, grants banking licences to them and suspends and revokes such licences.

Data on the establishment, reorganization and liquidation of credit institutions and other data stipulated by federal laws are entered into a single state register of legal entities by an authorized registering body on the basis of the Bank of Russia decision on corresponding state registration. The Bank of Russia interacts with the registration authority on issues relating to the state registration of credit institutions in accordance with the procedure agreed by the Bank of Russia with the registration authority.

For the procedure of registration of credit institutions and licensing of banking activities, see also the Bank of Russia Instruction No. 135-I, dated April 2, 2010, "On the Procedure for Making Decisions by the Bank of Russia on the State Registration of Credit Institutions and Issuing Banking Licences".

To fulfill its controlling and supervisory functions, the Bank of Russia keeps the State Register of Credit Institutions in accordance with the procedure established by federal laws and the Bank of Russia rules and regulations issued in pursuance of these laws.

The register of licences granted to credit institutions must be published by the Bank of Russia in *the Bank of Russia Bulletin* at least once a year. Any change or addition to the register is published by the Bank of Russia within one month from the day it was entered into the register.

Information on official registration of credit institutions, granting them licences, changes in their names, location, restructuring and liquidation are reported in *the Bank of Russia Bulletin* and placed on the Bank of Russia' website.

 licence to conduct banking operations for nonbank credit institutions which are central counterparties.

The following types of banking licences may be issued to an operating bank for expansion of its activities:

- universal licence to conduct banking operations in rubles and foreign currency (without the right to accept individual deposits) and accept and invest precious metals;
- universal licence to conduct banking operations in rubles and foreign currency (with the right to accept individual deposits) and accept and invest precious metals;
- universal licence to conduct banking operations in rubles and foreign currency and accept and invest precious metals (without the right to accept individual deposits and implement collection of cash, bills, payment and settlement documents and cash service of individuals and legal entities);
- basic licence to conduct banking operations in rubles and foreign currency (without the right to accept individual deposits) and accept and invest precious metals;
- basic licence to conduct banking operations in rubles and foreign currency and accept and invest precious metals (without the right to accept individual deposits and implement collection of cash, bills, payment and settlement documents and cash service of individuals and legal entities);
- basic licence to conduct banking operations in rubles and foreign currency (with the right to accept individual deposits) and accept and invest precious metals.

**Bank with a universal licence** – bank entitled to perform banking operations specified in Part 1 of Article 5 of the Federal Law "On Banks and Banking Activities".

**Bank with a basic licence** – bank entitled to perform banking operations specified in Part 1 of Article 5 of the Federal Law "On Banks and Banking Activities" subject to the restrictions established by Article 5.1 of the Federal Law "On Banks and Banking Activities".

**The authorized capital of a credit institution** is based on funds contributed by owners (shares and other equity) and determines the minimum amount of assets serving as a guarantee to creditors.

As of the date of application for the state registration and a licence to conduct banking operations the minimum amount of the share capital for newly created credit institution complies with Article 11 of theFederal Law "On Banks and Banking Activities".

**Registered authorized capital of credit institutions** – aggregate value of credit institutions' authorized capitals as registered in the State Register of Credit Institutions.

**Branches of credit institutions having the right to conduct banking operations** — structural units of credit institutions located separately from headquarters, which perform on their behalf a full range or selected banking transactions specified by the Bank of Russia licence.

The line "PJSC Sberbank branches" shows branches of PJSC Sberbank that were entered into the State Register of Credit Institutions and had their reference numbers assigned. Before January 1, 1998, the line provided the total number of PJSC Sberbank branches as part of monthly information on credit institutions.

**Representative offices of operating credit institutions** – autonomous structural units of credit institutions having a different location, acting on their behalf and protecting their interests. Representative offices are not entitled to conduct banking operations.

Additional offices, cash credit offices, external cash desks, operational offices, mobile banking offices of credit institutions having the right to conduct banking operations — special internal divisions of credit institutions (their branches), particularities of their establishment (liquidation) and activities are stipulated by the normative acts of the Bank of Russia.

**Credit institutions under liquidation** — credit institutions under liquidation pursuant to relevant decisions:

 decision of the credit institution's stockholders (equity holders) or its body authorised to do so by the founding document taken in accordance with Clause 2 Article 61 of the Civil Code of the Russian Federation (voluntarily liquidation);

- decision of an arbitration court on the liquidation of the credit institution and appointing a liquidator taken in accordance with Article 23.1 of the Federal Law 'On Banks and Banking Activities' (compulsory liquidation);
- decision of an arbitration court on recognizing bankruptcy of the credit institution and appointing an interim trustee taken in accordance with the Federal Law "On Insolvency (Bankruptcy)".

### Table 4.1.2 Data on Provisional Administrations Assigned to Credit Institutions Whose Banking Licences Have Been Revoked

### **General Provisions**

The table contains data on provisional administrations operating at credit institutions whose licences have been revoked.

Provisional administrations were assigned to credit institutions in compliance with Clause 2 of Article 189.26 of Federal Law No. 127-FZ, dated 26 October 2002, 'On Insolvency (Bankruptcy)'.

Subsection 4.2 Borrowings

### Table 4.2.1 Funds (Deposits) of Individuals Accepted by Credit Institutions Table 4.2.2 Funds of Legal Entities Accepted by Credit Institutions

#### **General Provisions**

These tables present data on one of the major transactions in liabilities, namely, funds accepted by credit institutions in rubles and foreign currency from legal entities and individuals to deposits. Data are broken down by maturity, according to the maturities of deposits and other funds accepted by credit institution specified in the agreement, including all addenda thereto. The tables show total account balances accepted by credit institutions to deposits. The data compilation methodology for the information in these tables differs from that used for similar data in the "Credit Institutions Survey" table, which is used for the analysis of money supply and its structure. The data in tables 4.2.1 and 4.2.2 do not cover deposits of legal entities and individuals with Vnesheconombank, which is not on the list of operating credit institutions, but include funds accepted from non-residents. They also do not cover accrued interest. Differences in individual indicators can be found below.

The table "Funds of Legal Entities Accepted by Credit Institutions" contains data on deposits and other funds accepted, including individual entrepreneurs' deposits. Funds raised from credit institutions are presented including loans, deposits, and other raised funds. Individual entrepreneurs' deposits are also shown separately (memo item).

The data source is reports filed by Russian operating credit institutions under Form 0409101 "The Trial Balance of a Credit Institution" in accordance with Bank of Russia Ordinance No. 4927-U, dated October 8, 2018, "On the List, Forms and Procedure for Compiling and Presenting Credit Institutions' Reporting Forms to the Central Bank of the Russian Federation".

### Individual Indicators Highlights

**Currency deposits by maturity** – cash and non-cash funds in Russian or foreign currency placed by legal entities and individuals (both residents and non-residents) with credit institutions under bank deposit agreements or bank account agreements (including savings / deposit certificates). The tables provide a breakdown of deposits by type of depositors (individuals and legal entities (corporate clients and government authorities) and by maturity. These indicators do not include funds in legal entities' settlement accounts and individual entrepreneurs' accounts, the funds of individuals' election funds, transfers from and to the Russian Federation, interest arcears, accrued interest on deposits accounted for in separate accounts, and balances of accounts which cannot be classified unambiguously.

**Demand deposits** are funds that must be returned (paid out) at first notice (on demand deposit terms) and funds that must be returned (paid out) upon the onset of the condition (event) provided for in the agreement, whose specific date is unknown (on the terms "upon the onset of the condition (event)".

*Time deposits* are deposits taken by a credit institution on the condition that they will be returned upon the expiry of the time period established by the agreement. Interest rates on time deposits are set by credit institution deposit agreements.

**Deposits of individuals** are deposits and other funds accepted by credit institutions from individuals (including savings certificates), unfulfilled obligations under deposit-taking and other borrowing arrangements and funds in individuals' other accounts. This indicator does not include the funds of individual entrepreneurs, individuals' election funds and transfers from and to the Russian Federation.

**Deposits and other funds raised from legal entities** are deposits and other funds raised (on demand or for a specified term) from government authorities and extra-budgetary funds of all levels, as well as corporate clients (financial (other than credit) and non-financial institutions of any form of incorporation (including certificates of deposit), and individual entrepreneurs), as well as unfulfilled obligations under deposit and other borrowing arrangements.

**Deposits of individual entrepreneurs** are deposits, including unfulfilled obligations under these deposits, of individuals engaged in entrepreneurial activities without registering as a legal entity.

Loans, deposits and other funds accepted from credit *institutions* are deposits, loans and other funds raised from non-resident credit institutions and banks.

### Table 4.2.3 Weighted Average Interest Rates on Deposits of Individuals and Nonfinancial Organizations in Rubles Table 4.2.4 Weighted Average Interest Rates on Deposits of Individuals and Nonfinancial Organizations in US Dollars and Euros

### **General Provisions**

The tables contain weighted average interest rates of deposits (excluding the State Development Corporation "VEB.RF"), and including non-bank credit institutions that are licensed to perform loan and deposit operations (further – credit institutions), which are borrowed by credit institutions from individuals and nonfinancial organizations (excluding individual entrepreneurs since January, 2016) in rubles, in US dollars and in euros. The data are presented with a breakdown by maturity.

The source of information is the Reporting Form 0409129 "Weighted Average Interest Rates Funds offered by Credit Institutions" compiled by credit institutions in accordance with the Bank of Russia Ordinance No. 4927-U, dated October 08, 2018, "On the List, Forms and Procedure for Compiling and Presenting Credit Institutions Reporting Forms to the Central Bank of the Russian Federation".

This information is available on the Bank of Russia's website.

### Individual Indicators Highlights

Weighted average interest rates on deposits by individuals / nonfinancial organizations are weighted average annual interest rates on deposits in the reporting month and are calculated by the formula:

$$\bar{P} = -\frac{\sum PV}{\sum V}$$
, where

P- weighted average deposit interest rate;

V1...n- amount of a deposit as included in an agreement;

 $\mathsf{P1}...\mathsf{n}\,$  – nominal annual deposit interest rate as included in an agreement.

The values of weighted average interest rates and corresponding turnovers are not calculated in case there are data on less than three credit institutions.

### Table 4.2.5 Savings (Deposit) Certificates, Bonds and Bills of Exchange Issued by Credit Institutions

### **General Provisions**

The table contains data on ruble and foreign currency funds raised by credit institutions by issuing debt securities (deposit and savings certificates, bonds and bills). Nominal values of deposit and savings certificates and bonds are provided with a breakdown by maturity. If there is no information on the values of certificates and bonds with specific maturities, this means that no funds under these securities with these maturities were raised over the periods reviewed in the table. This table does not include obligations to pay interest and coupon accrued on issued securities.

The data source is reports filed by Russian operating credit institutions under Form 0409101 "The Trial Balance of a Credit Institution" in compliance with Bank of Russia Ordinance No. 4927-U, dated October 8, 2018, "On the List, Forms and Procedure for Compiling and Presenting Credit Institutions' Reporting Forms to the Central Bank of the Russian Federation".

### Individual Indicators Highlights

Savings / deposit certificate - a kind of time deposit (see the commentary to the indicator "Time deposits" in the tables "Deposits of Individuals Accepted by Credit Institutions" and "Funds of Organisations Accepted by Credit Institutions") and a security that certifies the amount of a deposit made with a credit institution and the right of the depositor (certificate-holder) to receive, upon the expiry of the agreed term, the deposit and interest indicated in the certificate of the credit institution that issued the certificate or any of its branches. Savings certificates (certificates of deposit) are denominated in rubles. For more detailed information about savings certificates and certificates of deposit, see the Regulation "On Savings and Deposit Certificates Issued by Credit Institutions", approved by Bank of Russia Ordinance No. 333-U, dated August 31, 1998. In the tables "Deposits of Individuals Accepted by Credit Institutions" and "Funds of Legal Entities Accepted by Credit Institutions", the savings certificates and certificates of deposit are included in individuals' and organisations' deposits, respectively.

**Bond** is a financial security certifying the holder's right for receiving, in due time, the nominal value of the bond or some other tangible equivalent from the bond issuer. Bonds also provide fixed interest payments or some other tangible equivalent.

**Bill** is a direct financial liability that is completed in a legally prescribed form and issued by a promissor to a bill holder and gives the latter the unconditional right to make claims to the promissor in terms of the specific amount, time and place.

**Banking bill of exchange** is a bill that is mainly used for raising funds by a credit institution.

**Acceptance** is an agreement on the repayment of a bill of exchange that imposes the relevant obligation on the acceptor.

**Bank acceptance** is a bill secured by the credit institution's unconditional obligation to pay a specific amount after a certain period (as accepted by the credit institution).

### Subsection 4.3 Lending

### Table 4.3.1 Loans, Deposits, and Other Funds Extended to Corporate Clients and Individuals

#### **General Provisions**

The table shows data covering major investment activity of banks, that is, extending loans, deposits, and other funds to resident and non-resident clients. The data show lending account balances as of the reporting date with a breakdown by currency (rubles and foreign currency), borrower type (individuals, legal entities, and credit institutions) and loan maturity (as indicated in credit agreements).

The data source is reports filed by Russian operating credit institutions under Form 0409101 "The Trial Balance of a Credit Institution" in compliance with Bank of Russia Ordinance No. 4927-U, dated October 8, 2018, "On the List, Forms and Procedure for Compiling and Presenting Credit Institutions' Reporting Forms to the Central Bank of the Russian Federation".

### Individual Indicators Highlights

Loans and other funds extended ito corporate clients (non-financial and financial (other than credit) institutions and individual entrepreneurs) and individuals — amounts borrowed by clients from credit institutions on all of these categories of funds, including overdue debt. In addition to amounts borrowed by individuals and corporate clients, the total includes loans extended to foreign governments, as well as debt and arrears on operations with precious metals, other than operations with credit institutions.

**Loans and other funds extended to individuals** are amounts borrowed from credit institutions by resident and non-resident individuals (other than individual entrepreneurs), including overdue debt.

Loans and other funds extended to corporate clients, by maturity— amounts borrowed on all loans and other placements by financial (other than credit) and non-financial institutions of any form of incorporation and individual entrepreneurs, both residents and non-residents, excluding overdue debt. (The structure of financial (other than credit) institutions and nonfinancial organisations corresponds to the concepts "other financial institutions" and "non-financial organisations" in the notes to the table "Central Bank Survey"). Loans provided for up to 30 days include on-demand and overdraft loans (an overdraft loan is a loan extended to a borrower who has a shortage of funds available in its current account).
