

To CEOs of organisations  
participating in electronic exchange  
with the Bank of Russia  
(4525000829)

On the publication of  
the AWS of a BoR Customer-FMS

### Information notice

The Payment System Operation Centre of the Information Technology Department (hereinafter, the PSOC ITD) informs electronic exchange participants that the Bank of Russia website ([www.cbr.ru/eng/development/mcirabis/involve\\_spfs/](http://www.cbr.ru/eng/development/mcirabis/involve_spfs/)) was updated with the new version of the AWS of a BoR Customer-FMS:

- AWS of a BoR Customer-FMS version 2020.2.1 ('spfs2020.2.1.rar').

What is new in the AWS of a BoR Customer-FMS:

- The issue with the case of filenames exported by Service Bureau customers was resolved.

Please be aware that each folder extracted from the '\*.rar' archive contains 'hash.txt' and '\*.zip' files. The 'hash.txt' file contains the list of the controlled files of the BoR Customer software and a hash code calculated with the hash algorithm in accordance with GOST R 34.11-2012.

The archives were created with WinRAR 5.50.

The PSOC ITD reminds you that when the BoR Customer software will be distributed among the exchange participants through the automated system – 'Transport gateway of the Bank of Russia for exchange of payment and financial messages with customers of the Bank of Russia' ('BoR Customer TG') – and two information notices will be sent: main notice (on the distribution of new version of the BoR Customer software) and additional notice with recommendations on how to check software integrity. The latter will not be published on the Bank of Russia website.

The updated software will be implemented on receipt.

This notice will be published on the Bank of Russia website at [www.cbr.ru/eng/development/mcirabis/involve\\_spfs/](http://www.cbr.ru/eng/development/mcirabis/involve_spfs/).
