

To CEOs of organisations  
participating in electronic exchange  
with the Bank of Russia

On the publication of  
the AWS of a BoR Customer-FMS  
and its documentation

### Information notice

The Payment System Operation Centre of the Information Technology Department (hereinafter, the PSOC ITD) informs electronic exchange participants that the Bank of Russia website ([www.cbr.ru/eng/development/mcirabis/involve\\_spfs/](http://www.cbr.ru/eng/development/mcirabis/involve_spfs/)) was updated with the new version of the AWS of a BoR Customer-FMS:

- AWS of a BoR Customer-FMS version 2020.3.1 ('spfs2020.3.1.rar').

And new software documentation:

- AWS of a BoR Customer-FMS. Administrator's Guide ('kbr-spfs\_admin.rar')

What is new in the AWS of a BoR Customer-FMS:

- Updates to support the UFEBM Album version 2020.3.1;
- Support of the one at a time reception of messages from the BoR Customer TG;
- Redirection to reserve hosts of the BoR Customer TG, in case the main host is unavailable;
- Processing of HTTP redirection received from the BoR Customer TG;
- Option to request COA and COD confirmations when sending messages to the BoR Customer TG via MQ protocol;
- Improved FMS directory: entries returned by a request are not deleted if a procedural EM574 is received;

The PSOC ITD notes that the new reception mode ('One at time') will be available after the BoR Customer TG is updated. The list of reserve hosts will also be provided after the update is completed. Exchange participants will be notified accordingly.

What is new in the Administrator's Guide:

- Section 5.1.10 of the ‘AWS of a BoR Customer-FMS. Administrator's Guide’ now includes new interaction settings: one at a time reception, reserve hosts, requests of delivery and reception confirmations;

Please be aware that each folder extracted from the ‘\*.rar’ archive contains ‘hash.txt’ and ‘\*.zip’ files. The ‘hash.txt’ file contains the list of the controlled files of the BoR Customer software and a hash code calculated with the hash algorithm in accordance with GOST R 34.11-2012.

The archives were created with WinRAR 5.50.

The PSOC ITD reminds you that when the BoR Customer software will be distributed among the exchange participants through the automated system – ‘Transport gateway of the Bank of Russia for exchange of payment and financial messages with customers of the Bank of Russia’ (‘BoR Customer TG’) – and two information notices will be sent: main notice (on the distribution of new version of the BoR Customer software) and additional notice with recommendations on how to check software integrity. The latter will not be published on the Bank of Russia website.

The concurrent testing of the BoR Customer software and the CDPC-level RABIS-NP sub-systems is available from 1 June 2020.

Deadline for transition to the new versions of BoR Customer software and UFEBM Album: 29 June 2020.

This notice will be published on the Bank of Russia website at [www.cbr.ru/eng/development/mcirabis/involve\\_spfs/](http://www.cbr.ru/eng/development/mcirabis/involve_spfs/).
