New information

This issue has been amended to include Table 3.1.1. “Monthly Average Moscow Interbank Bid Rates (MIBID)”, Table 3.1.2. “Monthly Average Moscow Interbank Offered Rates (MIBOR)”, Table 3.1.3. “Monthly Weighted Average Moscow Interbank Actual Credit Rates (MIACR)” which characterize average monthly rates in the interbank credit market from January 1997.

To improve the existing practice of disseminating data in accordance with IMF Special Data Dissemination Standard (SDDS), we herein inform our readers about approximate dates of publication of some banking statistics indicators in August—October 1999:

	Issue of data in 1999					
	August		September		October	
	dissemination date	period for which data are presented	dissemination date	period for which data are presented	dissemination date	period for which data are presented
1. Main aggregates of analytical accounts of banking sector — money M0, M2 (monetary survey methodology), domestic credit (broken down by resident sectors) and net external position, end of period	31.08.99*	7.99	30.09.99*	8.99	29.10.99*	9.99
2. Main aggregates of analytical accounts of monetary authorities — reserve money, claims on general government and non-financial public enterprises, claims on private sector, claims on credit institutions and net external position, end of period	16.08.99*	7.99	15.09.99*	8.99	15.10.99*	9.99
3. Balance of payments: exports and imports of goods (FOB), exports and imports of services, investment income, compensation of employees, current transfers, capital transfers, direct investment, portfolio investment, other investment, reserve assets, adjustment to reserve assets, net errors and omissions, for the reporting quarter, year			29.09.99	Q2.99		
4. International reserves: monetary gold, foreign exchange, Special Drawing Rights (SDRs), reserve position in the IMF, end of period	9.08.99	7.99	7.09.99	8.99	7.10.99	9.99
5. Merchandise trade for reporting month (according to the balance of payments methodology)	12.08.99	6.99	13.09.99	7.99	12.10.99	8.99
6. International investment position of credit institutions: direct, portfolio and other investment end of reporting quarter			29.09.99	Q2.99		
7. Official US dollar/ruble rate	daily		daily		daily	
8. Interest rates of Central Bank of Russia (CBR)						
8.1. Refinancing rate	On the next day after it is fixed by the Bank of Russia Board of Directors					
8.2. Overnight credit rate	daily		daily		daily	
8.3. Deposit rate	daily		daily		daily	

* Preliminary data publication date.

The CBR disseminates data on the above-mentioned categories and also actual money market rate (MIACR) and share price index on the CBR Internet web-site (<http://www.cbr.ru>).

CONTENTS

1. MAJOR MACROECONOMIC AND MONETARY INDICATORS	
1.1. Macroeconomic Indicators	6
1.2. Individual Indicators Featuring the Fiscal Sphere	7
1.3. Sources of Funding the Federal Budget Deficit	8

1.5. The Russian Federation Credit Institutions' International Investment Position*	16
1.6. The Russian Federation Merchandise Trade (Based on the Balance of Payments Methodology)*	17
1.7. Gross International Reserves*	18
1.8. Analytical Accounts of Monetary Authorities*	20
1.9. Analytical Accounts of Credit Institutions	21
1.10. Monetary Survey*	24
1.11. Money Supply (National Definition)	26
 2. MAJOR INDICATORS AND INSTRUMENTS OF THE BANK OF RUSSIA MONETARY POLICY	
2.1. Bank of Russia Balance Sheet	28
2.2. Refinancing Rate*	29
2.3. Credit Institutions' Fixed Percentage Ratios in Bank of Russia Required Reserves	29
2.4. Individual Indicators of the Bank of Russia Deposit Transactions on the Money Market*	31
2.5. Official US Dollar to Ruble Rate*	33
2.6. Official Euro to Ruble Rate	36
2.7. Official German Mark to Ruble Rate	37
2.8. Bank of Russia Precious Metals Quotes	39
2.9. Major Features of Transactions in GKO—OFZs	
2.9.1. Data on Redemptions and Coupon Payments on Government Securities	40
2.9.2. Term Structure of Bonded Debt (with Respect to GKO and OFZ)	40
2.9.3. Major Parameters of the GKO—OFZs Secondary Market	41
 3. FINANCIAL MARKETS	
3.1. Interbank Credit Market	
3.1.1. Monthly Average Moscow Interbank Bid Rates (MIBID)	44
3.1.2. Monthly Average Moscow Interbank Offered Rates (MIBOR)	45
3.1.3. Monthly Weighted Average Moscow Interbank Actual Credit Rates (MIACR)	46
3.1.4. Daily Average Moscow Interbank Bid Rates (MIBID)	47
3.1.5. Daily Average Moscow Interbank Offered Rates (MIBOR) and Daily Weighted Average Moscow Interbank Actual Credit Rates (MIACR)*	48

3.2. Exchange Market

3.2.1. US Dollar Trade at Interbank Currency Exchange	49
3.2.2. German Mark Trade at Interbank Currency Exchange	51
3.2.3. Foreign Cash Flow Through Authorized Banks Across Russia	52
3.2.4. Selected Indicators Featuring Foreign Cash Transactions by Authorized Banks' Exchange Offices	54
3.2.5. Average Foreign Cash Purchase and Sale Transactions with Individuals by Authorized Banks and Their Branches	57

3.3. Corporate Securities Market Indicators* 59**3.4. International Financial Markets**

3.4.1. Treasury Bills Yield	60
3.4.2. Money Market Rates	61
3.4.3. Deposit Rates	62
3.4.4. Lending Rates	63

4. CREDIT INSTITUTIONS PERFORMANCE**4.1. General Description**

4.1.1. Number and Structure of Credit Institutions	64
4.1.2. Credit Institutions Grouped by Registered Authorized Capital	67
4.1.3. Selected Indicators of Credit Institutions Performance Grouped by Assets	69

4.2. Borrowings

4.2.1. Deposits	71
4.2.2. Average Weighted Deposit Interest Rates in Rubles	74
4.2.3. Average Weighted Deposit Interest Rates in US Dollars	75
4.2.4. Deposit and Savings Certificates and Bonds	76
4.2.5. Average Weighted Interest Rates on Deposit an Savings Certificates and Bonds	77
4.2.6. Funds Owned by Legal Entities and Individuals and Raised Through Bills	78
4.2.7. Average Weighted Interest Rates on Bills	79

4.3. Lending

4.3.1. Corporate, Interbank and Personal Loans	80
4.3.2. Average Weighted Interest Rates on Corporate, Interbank and Personal Loans in Rubles	82
4.3.3. Average Weighted Interest Rates on Corporate, Interbank and Personal Loans in US Dollars	83
4.3.4. Credit Institutions' Investment Portfolio	84
4.3.5. Discounted Bills	86
4.3.6. Average Weighted Interest Rates on Discounted Bills	87

4.4. Credit Institutions' Claims and Liabilities on Financial Derivatives 89**5. SUMMARY METHODOLOGY 92**

List of Charts

1.	Changes in Gross International Reserves (Rate of Increase/Decrease from Previous Month)	19
2.	Changes in Gross International Reserves from May 29, 1998 to July 16, 1999	19
3.	Structure of Aggregate Assets of Credit Institutions as of 31.05.99	23
4.	Structure of Aggregate Liabilities of Credit Institutions as of 31.05.99	23
5.	Money Supply Dynamics	27
6.	Dynamics of Individual Indicators on the Bank of Russia Overnight Deposits	30
7.	Interest Rates Dynamics in 1997–1999	32
8.	Interest Rates Dynamics in October, 1998 – June, 1999	32
9.	Official US Dollar to Ruble Exchange Rate Dynamics in August, 1998 – June, 1999	35
10.	Dynamics of Foreign Cash Purchase and Sale Transactions with Individuals by Authorized Banks and Their Branches	56
11.	Foreign Cash Sources in May, 1999	58
12.	Structure of Foreign Cash Expenditures in May, 1999	58
13.	RTS-Interfax Index Dynamics	59
14.	Structure of Registered Credit Institutions	68
15.	Credit Institutions Grouped by Registered Authorized Capital	68
16.	Comparative Data on Major Sources of Borrowing by Credit Institutions as of 31.05.99 (Based on Credit Institutions Grouped by Assets)	70

of which:												
— reorganisation into branches of other banks	299	301	301	302	303	303	306	307	307	308	308	
— taken over by other banks (without creating a branch)	20	20	22	23	23	23	25	25	25	26	26	
— credit institutions liquidated by partners on a voluntary basis	4	4	4	4	4	4	4	4	4	4	4	

¹ Issued since December 1996 in accordance with Bank of Russia Letter No. 367 of December 3, 1996.

² Data on Agroprombank branches have not been published since January 1, 1999, as the bank has closed most of its branches.

³ As of December 31, 1997, the number of Russian credit institutions's branches abroad includes branches for whose opening the Bank of Russia gave permission. In future periods operating branches of Russian credit institutions abroad are indicated.

⁴ These comprise representative offices whose opening abroad was made known to the Bank of Russia.

5. SUMMARY METHODOLOGY

Section 1. Major Macroeconomic and Monetary Indicators

Table 1.1

Macroeconomic Indicators

General Provisions

The “Macroeconomic Indicators” table contains major (indicative) indicators characterizing the country’s macroeconomic situation.

Individual Indicators Highlights

Gross domestic product (GDP) — end result of resident producers’ economic operations for the reporting period.

GDP can be calculated on the basis of three methods: production method, end use method, and income distribution method.

The table presents GDP calculated by *production method* as a difference between overall output of goods and services across the country, on the one hand, and intermediate consumption, on the other, or as a sum total of values added that are created by the economy.

Depending on the research area, GDP can be also calculated by *end use method* as a sum total of costs across all economic sectors for final consumption, gross capital formation, and net export. The framework for SNA calculations implies the use of *income distribution method* for compiling GDP which reflects primary income received by units directly involved in production, as well as by general government (spending units) and nonprofit organizations serving households.

Pursuant to Procedures for developing and submitting data on gross domestic product (approved on 19 October 1998), since October 1998 GDP has been calculated by Goskomstat with an annual and quarterly frequency.

Collecting more reliable data and applying new information sources can entail updates of GDP’s current statistical estimates.

GDP estimates and final results of its calculations are released by Goskomstat in due course in Goskomstat’s regular reports “Russia’s Socio—Economic Situation”, “Statistical Review” Bulletin, other publications, as well as in the IMF statistical publication “International Financial Statistics”.

For more details on the compilation of the “Gross Domestic Product” indicator see the first issue of “Methodological Provisions on Statistics” (Moscow: Logos, 1996).

Percentage GDP against the previous year’s relevant period is calculated by the RF Committee on Statistics (Goskomstat of Russia) in comparable prices for the previous year.

Percentage output of basic industries’ production and services to the previous year’s relevant period — since October 1998 is calculated by Goskomstat on the monthly basis for measuring

major economic development tendencies as the index of production output change by five basic industries (manufacturing, agriculture, construction, transport, trade, and public catering) covering approximately 70% of an overall production and services output across Russia.

The Federal budget deficit to gross domestic product percentage is calculated by the CBR as a percentage ratio of the federal budget deficit to gross domestic product for a corresponding period.

Sources for calculating the said indicator are Goskomstat’s data on gross domestic product and the RF Finance Ministry report data on the federal budget performance.

Consumer price index (CPI) — one of the most important indicators characterizing inflation rate. CPI reflects a change in time of the overall level of prices of goods and services purchased by households for nonproduction use. This index is calculated by Goskomstat as a ratio of cost for a fixed set of goods and services in the current period to its cost in the previous (base) period.

CPI monthly data are released in Goskomstat’s regular reports “Russia’s Socio—Economic Situation”, “Statistical Review” Bulletin, other publications by Goskomstat, as well as in the IMF “International Financial Statistics”.

For more details on compiling this indicator see the first issue of “Methodological Provisions on Statistics” (Moscow: Logos, 1996).

Table 1.2

Individual Indicators Featuring the Fiscal Sphere

General Provisions

The “Individual Indicators Featuring the Fiscal Sphere” table comprises information on accumulated financial resources and expenditures made in the Russian Federation budgetary sphere, and also shows apportionment of the consolidated budgetary revenues and expenditures across the fiscal system levels.

The table’s structure has been developed on the basis of the Russian Federation budgetary classification.

Individual Indicators Highlights

Budgetary revenues — money received on an irrevocable basis as grants in compliance with the Russian Federation laws to the discretion of the Russian Federation federal government authorities, government authorities in the Russian Federation member territories, and local governments. They are formed through tax and nontax receipts, and

grants. The current year's budget revenues also comprise cash balance at the previous year end.

Tax receipts — incorporate federal, regional, and local taxes and fees as well as fines and penalties envisaged by the Russian Federation tax law.

Nontax revenues include: revenues from the use of government or municipal property; revenues from selling or any other revocable divestiture of government or municipal property; receipts from paid services rendered by relevant government authorities, by local authorities, and by spending units reporting respectively to federal executive authorities, to the Russian Federation member territories, local authorities, and some other amounts raised through forced seizure.

Budgetary expenditures — funds transferred to finance the government's and local authorities' purposes and functions.

Budget deficit/surplus — excess of budgetary expenditures over its revenues/excess of budgetary revenues over its expenditures.

Indicators in this table are calculated on a monthly basis by the Russian Federation Finance Ministry.

More detailed information on the federal budget deficit is released in the "Sources of Funding the Federal Budget Deficit" table.

Table 1.3
Sources of Funding the Federal Budget Deficit

General Provisions

The "Sources of Funding the Federal Budget Deficit" table shows amounts and a breakdown of sources for funding the federal budget deficit.

The table incorporates major sources of covering the federal budget deficit. Their grouping was based on the budgetary classification approved by federal law.

All indicators in the table are calculated by the Russian Federation Finance Ministry on a monthly basis.

¹ **The Russian Federation residents** incorporate individuals and legal entities, as well as unincorporated enterprises and organizations whose center of economic interests is located on the Russian Federation economic territory.

The RF economic territory is a geographical territory which includes free zones under the RF Government jurisdiction within which labor, goods, and capital can be freely trafficked.

An institutionalized unit is regarded to have its center of economic interest within the country provided that being located on this country's economic territory it handles economic transactions in significant volumes during a long period of time. In compliance with the above definition the Russian Federation residents include:

1. Individuals living permanently or for a long period of time (a year or over) on the RF territory or temporarily staying outside the RF;
2. The RF citizens: civil servants (including diplomats) and military staff working abroad, students studying abroad, and individuals undergoing medical treatment abroad regardless of the duration of their stay outside the RF;
3. Incorporated entities set up in compliance with the Russian Federation law and located on its territory;
4. Incorporated entities with Russian investments set up in compliance with foreign countries' laws as well as Russian incorporated entities' representative offices that operate on foreign countries' territories for less than a year;
6. Branches and representative offices of the RF resident incorporated entities located on the RF territory;
6. Branches and representative offices of the RF nonresident incorporated entities located on the RF territory and operating on its territory for one year or longer;
7. Diplomatic and other RF official representative offices located outside the RF territory.

Table 1.4
The Russian Federation
Balance of Payments

General Provisions

The Russian Federation balance of payments (thereafter referred to as balance of payments) presents a statistical framework which reflects all economic transactions between the Russian Federation residents and nonresidents¹ within the reporting period.

The "Russian Federation Balance of Payments" table is compiled and released by the CBR on a quarterly basis.

Balance of payments data are one of the major instruments used for elaborating the country's macroeconomic policies, namely: foreign trade policy, foreign exchange regulation and control, foreign exchange rate policy.

The balance of payments is compiled by the CBR based on the RF Law "On the Central Bank of the Russian Federation (Bank of Russia)" dated 26 April 1995 and the Russian Federation Government Order No. 849 dated 18 July 1994. The International Monetary Fund's fifth edition of the "Balance of Payments Manual" serves a methodological basis for the balance of payments.

Sources of information are report data on all foreign economic transactions of Russian resident received on a regular basis by the CBR from the RF Finance Ministry, the RF State Customs Committee, the RF State Committee on Statistics (Goskomstat), the Russian Federal Migration Service, the Federal Border Patrol Service, the RF Defense Ministry, the RF Ministry for Emergencies, credit institutions, non-financial entities, as well as estimates. A specific list of report forms applied when compiling the balance of payments and other information is given in special issues of the "Bank of Russia Bulletin" that contain more detailed data on the balance of payments for the reporting period and methodology for its compilation (see, for example, "Bank of Russia Bulletin" No. 43 (298) dated 29.06.98).

The table presented in the “Bulletin of Banking Statistics” is an analytical presentation of the balance of payments. In contrast with neutral presentation prescribed by international standards, an analytical presentation enables to encompass the country’s specifics and to group data in such a way that provides the best coverage of the most significant transactions for Russia (in particular, the balance of payments’ financial account enables to track, firstly, total financial resources contracted from non-residents which is treated as net increment in total foreign liabilities or investments into the Russian economy, and secondly, net increment in Russian residents’ foreign assets, or net capital flight abroad; classification of assets and liabilities by the Russian economic sectors helps assess implications of a particular sector’s transactions for the country’s balance of payments, etc.).

Balance of payments data for previous years are subject to revision mainly because of the primary data base updates (for instance, the State Customs Committee makes quarterly updates of its previously released data). These revisions are also attributable to the emergence of new information sources and improvements in methodologies for calculating individual indicators. Such an approach guarantees to all users of balance of payments statistics an access to the most complete set of data that meets a comparability criterion.

Balance of payments data over the reporting period are placed on the CBR Internet web site and are published in the “Bank of Russia Bulletin”, in mass media (“Cammersant Daily”, etc.), and in the IMF “International Financial Statistics” and “Balance of Payments Statistics Yearbook”.

Individual Indicators Highlights

1. Current account includes transactions with goods, services, revenues and current transfers.

1.1. Goods. This item reflects cost of goods whose proprietary rights within the reporting period were transferred from residents to nonresidents (export) and from nonresidents to residents (import). Apart from export and import of goods registered by the Russian Federation State Customs Committee (SCC), this item incorporates the following transactions on exports/imports unrecorded by the SCC,

namely: exports/imports sold (purchased) without trafficking the customs border; migrants’ exports (imports); undeclared and/or understated goods when trafficked into the country by legal entities; trafficked in (out) by individuals for merchandising; other goods.

Exports and imports are given in FOB prices (FOB is the term for selling goods which implies that the price of goods includes its cost as well as its freight and delivery costs on board the ship in the port of departure).

1.2. Services — services rendered by residents to nonresidents and by nonresidents to residents (freightage, travel—related services, communication services, construction and financial services, royalties and license payments, operational leasing, and other services).

1.3. Investment income payable and compensation of employees received — returns from providing production factors (labor, capital) to nonresidents by residents or vice versa.

The “Compensation of employees received” item shows remuneration to employees received by them from nonresidents and payments to nonresident employees engaged in the Russian economy.

The “Investment income” item records returns from holding foreign financial assets which residents receive from nonresidents (interest, dividends and other similar forms of income) or vice versa.

1.4. Current transfers. A transfer is an economic transaction that results in one institutionalized unit providing another unit with goods, service, asset or proprietary right without receiving goods, service, asset or proprietary right as an equivalent in return. Transfers are divided into current and capital. Transfers that are not capital by definition are current (for a definition of capital transfers see para 2.1.1). Current transfers incorporate transfers that increase a disposable income and potential consumption of the country—recipient and reducing a disposable income and potential consumption of the donor—country, for instance, humanitarian aid in the form of consumer commodities and services, funds remittances provided they are not capital transfers.

2. Capital and financial instruments account includes two major categories: capital account and financial account.

The Russian Federation nonresidents incorporate individuals and legal entities, as well as unincorporated enterprises and organizations whose center of economic interests is located outside the Russian Federation economic territory.

In compliance with the above definition the Russian Federation nonresidents include:

1. Individuals living permanently or for a long period of time (one year or over) outside the RF territory or temporarily (less than one year) located on the RF territory;
2. Foreign countries’ citizens: civil servants (including diplomats) and military staff working in the RF, students studying in the RF, and individuals undergoing medical treatment in the RF regardless of the duration of their stay on the RF territory;
3. Incorporated entities set up in compliance with foreign countries’ laws and located on their territories;
4. Incorporated entities with foreign investments set up in compliance with the RF law, as well as their affiliates and foreign incorporated entities’ representative offices operating on the RF territory for less than a year;
5. Branches and representative offices of the RF nonresident incorporated entities located outside the RF territory;
6. Branches and representative offices of the RF nonresident incorporated entities located outside the RF territory and operating on foreign countries’ territory for one year or over;
7. Foreign diplomatic and other official representative offices as well as international organizations, their branches and representative offices located on the RF territory.

2.1. Capital account records capital transfers.

2.1.1. Capital transfers — result in the change of the donor's and recipient's assets and liabilities, for instance, irrevocable cession of proprietary rights to fixed assets, or writing off debts. Irrevocable transfer of funds is treated as a capital transfer only provided these funds are intended for purchasing fixed assets and for capital construction. Another feature of capital transfers is their significant volume and irregular character.

2.2. Financial account includes transactions in residents' assets and liabilities towards nonresidents. Assets and liabilities are classified by the Russian economic sectors (general government sector, banking sector, other sectors) within which transactions are split by the functional feature: direct investments, portfolio investments, other investments, and reserve assets.

2.2.1. Direct investments is a form of foreign investments which are made by a resident institutional unit of a country with a view of attaining sustainable influence on operations of the enterprise located in a different country. Sustainable influence implies the development of long-term relations between the investor and the said enterprise and also the investor's significance in managing this enterprise. Transactions recorded as direct investments include not only the initial transaction on attaining an equity share but also all further transactions between the investor and the given enterprise. Invested funds have the character of direct investments if the investor holds 10 or more percent of the enterprise's common shares of stock.

2.2.2. Portfolio investments. Along with the equity interest these investments also comprise debt financial instruments and financial derivatives. The said group does not comprise instruments already included into direct investments and reserve assets.

2.2.3. Other investments. All transactions which are not treated as transactions in direct and portfolio investments or in reserve assets are recorded in the "Other investments" item. Assets and liabilities in the "Other investments" item are subject to classification by financial instrument: foreign exchange cash and deposits; trade credits; grants and loans; outstanding debt; other assets and liabilities.

2.2.4. Reserve assets — monetary gold and liquid foreign assets of the CBR and the Russian Federation Finance Ministry denominated in convertible foreign currency. They include foreign currency cash, balances on correspondent and current accounts as well as on short-term deposits with nonresident and resident banks, liquid securities of foreign governments, IMF's assets (special drawing rights — SDRs, reserve position in the IMF), and other liquid assets.

2.2.5. Adjustment to reserve assets. Specifics of defining reserve assets in Russia is the incorporation into it of hard currency balances on accounts with resident banks which, in fact, do not

represent foreign assets. Introduction of the adjustment to reserve assets enables to exclude the said assets from the calculation of the balance of payments' financial account.

2.3. Net errors and omissions. This item sometimes called a balancing item or a statistical discrepancy, equilibrates surplus or deficit which are attributable to summing up of transactions recorded in the balance of payments.

Table 1.5 The Russian Federation Credit Institutions' International Investment Position

General Provisions

International investment position presents a statistical report which enables to estimate the country's foreign assets and liabilities as of the reporting period start and end and also all other changes that occurred within the reporting period as a result of financial transactions, value-related changes (re-value) and other changes.

The CBR is currently compiling the international investment position only by credit institutions (apart from Vnesheconombank) and publishes it in a tabulated format.

Data from the authorized banks' reports on foreign transactions serve as a source of information for compiling indicators on credit institutions' international investment position.

Methodological basis for the compilation of the table's indicators is the IMF "Balance of Payments Manual" fifth edition (1993).

Information on credit institutions' international investment position has significant importance for analyzing the country's economic standing and for formulating its economic policies (for instance, for developing and practical implementation of economic stabilization programs, estimation of the need in funds required for such programs implementation, other).

Information provided in the table in the "Assets" Section enables to make judgements on the amount of foreign economic claims held by Russian residents at the reporting period start and end, these assets' profile and the degree of their liquidity. Based on the data available, it appears possible to evaluate the changes in assets that occurred in the reporting period.

Consequently, indicators contained in the "Liabilities" Section enable to appreciate the volume of foreign economic liabilities for which Russian residents were liable at the reporting period start and end and also on these liabilities breakdown. Besides, data in the said section provides a picture on major causes behinds changes in liabilities that occurred in the reporting period.

Depending on whether the “Net International Investment Position” of credit institutions is positive or negative, it seems possible to attribute the sector under analysis to a “net creditor” or a “net debtor” with regard to nonresidents.

Individual Indicators Highlights

The table’s subject presents foreign assets and liabilities of Russian credit institutions at a specific date as major classification groups while the difference between them presents an amount of their net investment position. The table’s subject incorporates the following components:

Direct investments — a form of investments which are made by an institutional unit of a country with a view to acquiring sustainable influence on the operations of the enterprise located in another country. The attainment of sustainable influence implies setting up of long—term relations between the investor and the enterprise as well as an investor’s significant role in managing this enterprise. Transactions reflected as direct investments include not only initial transactions on the acquisition of the equity share, but also all consequent operations between the investor and the enterprise. To differentiate between direct and portfolio investments the following criterion is practically applied: if the investor holds 10 or more percent of the enterprise’s shares of stock, his holdings are regarded as direct investments.

Direct investments are classified by financial instruments into equity interest and reinvested revenues, and other capital.

Portfolio investments, along with equity interest, comprise negotiable debt and financial instruments. This group excludes instruments already incorporated into direct investments.

Other investments include all assets and liabilities which are not regarded as direct and portfolio. Other investments are classified by financial instrument’s type: foreign currency cash; current accounts and deposits; grants and loans; outstanding debt; other assets and liabilities.

The table’s predicate reflects Russian residents’ foreign assets/liabilities at the reporting period start and end; it also contains information on changes in foreign assets/liabilities in the below specified breakdown.

Transactions—related changes — only those net changes in foreign assets/liabilities are recorded occurrence of which was driven by transactions in these assets/liabilities. These transactions find their reflection in the relevant section of the Russia’s balance of payments financial account.

Revaluation—related changes and other changes reflect changes (by balance) unrelated to transactions and, therefore, excluded in Russia’s balance of payments.

Revaluation—related changes record net changes in assets/liabilities occurred as a result of

changes in foreign exchange rates and price levels, **other changes** record all other changes in assets/liabilities volumes (by balance) entailed by: reclassification (for instance, a transition from portfolio investments to direct ones as a result of the investor’s increased share in the invested enterprise’s equity); unilateral writing off the debt by the creditor; writing off the debt by verification results; other changes.

Total changes — sum total of net changes in assets/liabilities incurred by transactions made, revaluation, and other changes.

Table 1.6
The Russian Federation Merchandise Trade (Based on the Balance of Payments Methodology)

General Provisions

“The Russian Federation Merchandise Trade” table records monthly data on the Russian foreign trade broken down by the CIS member states and non—CIS countries, i.e. rest of the world. Information is presented in millions of US dollars in compliance with prices on goods specified in terms of FOB delivery.

Data in “The Russian Federation Foreign Trade” table are an inseparable part of the balance of payments current account and are developed in compliance with the IMF’s “Balance of Payments Manual” fifth edition.

The table is compiled based on the following information sources:

- SCC’ and Goskomstat’s report data on major exports and imports;
- Goskomstat’s report data on exports/imports unrecorded in customs statistics.

When compiling the table, the CBR makes expert estimates and corrections in report data on foreign trade transactions (transactions by individuals and incorporated entities unrecorded in customs statistics are evaluated separately). Besides, customs statistics report data expressed in CIF prices (CIF is the term of marketing the commodity under which commodity price includes its cost and insurance and freightage costs to the importing country’s port) are converted into FOB (for “FOB price” definition see comments to “Goods” indicator in the “The Russian Federation Balance of Payments” table) in compliance with the balance of payments compilation.

Foreign trade information is released in the weekly “Bank of Russia Bulletin” and is also located on the CBR Internet web site.

Individual Indicators Highlights

Commodity exports (based on the balance of payments methodology) — trafficking out of the Russian Federation customs territory of goods re-

corded by SCC in compliance with categories within the “general” foreign trade records framework, as well as export of commodities unrecorded by SCC, namely: marketed to nonresidents without crossing Russia’s customs boarder; bought by foreign transport vehicles in Russian ports; trafficked out by emigrants; trafficked out of the country by individuals for merchandising; other goods.

Commodity imports (based on the balance of payments methodology) — trafficking into the Russian Federation customs territory of goods recorded by SCC in compliance with the categories within the “general” foreign trade records framework, as well as supply of goods unrecorded by SCC, namely: purchase from nonresidents without crossing Russia’s customs border; goods bought by Russian transport vehicles in foreign ports; trafficked into the country by immigrants; undeclared and/or unreliably declared when trafficking by legal entities; trafficked by individuals for merchandising; other goods.

Trade balance position is defined as the difference between commodity export and commodity import.

Table 1.7
Gross International Reserves

General Provisions

International reserves present highly liquid financial instruments held by the CBR and the RF Finance Ministry and used for funding Russia’s balance of payments’ deficit as well as for maintaining confidence in the national currency.

International reserves are calculated based on the CBR on—balance data and flash information and also information from the RF Finance Ministry.

When developing international reserves data, the CBR is guided by the definition of gold and forex gross reserves which largely complies with the definition of this category available in the IMF “Balance of Payments Manual” fifth edition.

Data on international reserves are published on a regular basis in the weekly “Bank of Russia Bulletin”, the IMF statistical publication “International Financial Statistics”, as well as are placed on the CBR Internet web site (starting from June 1998 the CBR page shows monthly and weekly data on the Russian Federation international reserves).

Individual Indicators Highlights

International reserves consist of foreign exchange reserves and monetary gold.

Foreign exchange reserves include special drawing rights (SDRs), reserve position in the International Monetary Fund, and other foreign exchange assets. The latter include: balances on current ac-

counts, short—term deposits in nonresident and resident banks, foreign governments’ securities, REPO agreements on the said securities made with nonresidents, other liquid assets. Data are expressed in millions of US dollars. Foreign exchange assets are recalculated into US dollars based on cross—rates of foreign currencies calculated on the basis of official ruble rates to foreign currency set by the CBR and effective as of the reporting date.

Monetary gold is estimated as US\$300 for a Troy ounce. Monetary gold allocated at “metal” accounts is included into foreign exchange assets.

Analytical Accounts of Monetary Authorities, Analytical Accounts of Credit Institutions and Monetary Survey Tables

The tables entitled “Analytical Accounts of Monetary Authorities”, “Analytical Accounts of Credit Institutions”, and “Monetary Survey” represent aggregate indicators featuring the economy’s monetary sphere. Methodological basis for constructing the above indicated tables is a monetary survey scheme developed by the IMF as a standard analytical presentation of monetary statistics data. This scheme stipulates the compilation of major monetary aggregates based on accounting records on transactions and reserves of the CBR, the RF Finance Ministry, and credit institutions in such a way that enables to represent monetary liabilities of the specified organizations, on the one hand, and their claims on Russian enterprises, organizations and households, and the external world, on the other. Such data presentation is used for analyzing money supply and its profile as well as relationships between monetary authorities and other sectors of the Russian economy and nonresidents.

Within the term set by the IMF Special Data Dissemination Standard the CBR Internet web site publishes preliminary data on major indicators from “Analytical Accounts of Monetary Authorities” and “Monetary Survey”. Some elements of these are estimate—based. Within the quarter (for December data within half a year) data can be updated. Final data are released in the “Bulletin of Banking Statistics” and the IMF statistical publication “International Financial Statistics”.

Table 1.8
Analytical Accounts of Monetary Authorities

General Provisions

The Bank of Russia’s monthly aggregate balance sheet and the RF Finance Ministry’s flash data reflecting transactions on managing the Russian Fed-

eration international reserves are sources of information for compiling the “Analytical Accounts of Monetary Authorities” table.

Individual Indicators Highlights

Foreign assets — the Russian Federation international reserves (see their content in comments to the “Gross International Reserves” table) and less liquid, nonreserve assets. Nonreserve assets in this table comprise all other Bank of Russia’s assets placed with nonresidents¹, namely, assets denominated in currency with limited conversion potential and in the Russian Federation currency, and also long—term credits and deposits in convertible currency, and nonresident banks’ equity interest.

Claims on general government — loans extended to the RF Finance Ministry (Minfin), the RF government’s securities bought by the CBR, except for securities transferred to the CBR by credit institutions on REPO² terms. In compliance with international standards on analytical presentation of monetary authorities’ statistics, this indicator incorporates the IMF loans extended to Minfin.

Claims on nonfinancial public enterprises — credits (including outstanding debt), outstanding interest on credits extended to nonfinancial government enterprises³.

Claims on private sector — credits (including outstanding debt), outstanding interest on credits extended to nonfinancial nongovernment enterprises, self—employed individuals, and households as well as the Bank of Russia’s deposits into securities of private sector enterprises.

Claims on credit institutions — credit institutions’ arrears to the CBR (including loans extended to banks with revoked licenses and overdue interest on them) and funds extended to credit institutions on REPO terms.

Reserve money — cash issued by the CBR (excluding cash in its vaults), balances on required reserves’ accounts deposited by credit institutions with the CBR, on corresponding accounts, and other cash balances on accounts of credit institutions (including banks with revoked licenses) with the CBR, credit institutions deposits in the CBR bonds, as well as demand deposits of nonfinancial enterprises and organizations serviced in the CBR in compliance with the effective law.

Money outside banks — cash issued by the CBR excluding cash available in the CBR’s and credit institutions’ cash offices.

Time deposits and deposits in foreign currency — time deposits in the Russian Federation

currency and all deposits in foreign currency of nonfinancial enterprises and organizations serviced by the CBR in compliance with the effective law.

Foreign liabilities include all types of borrowings by the CBR from nonresidents (credits, deposits, nonresident banks’ correspondent accounts with the CBR, etc.) as well as IMF loans extended to Minfin and the CBR.

General government’s deposits — balances on accounts of the federal budget, the Russian Federation member—territories’ budgets and local budgets, deposits and other funds contracted from Minfin, fiscal authorities in the Russian Federation member—territories and local authorities, government extrabudgetary funds and extrabudgetary funds of the Russian Federation member—territories and local authorities. Apart from these items, the indicator includes a balancing entry equaling a sum total of international reserves administered by Minfin.

Capital accounts include the CBR’s authorized capital, supplementary capital, its reserve and other funds, and Bank of Russia losses in 1998.

Other items (net) — assets and liabilities balances excluded from the above mentioned aggregates that feature transactions in maintaining the CBR operations (fixed assets items, cost of economic operations, settlements with organizations affiliated with the CBR), as well as interbranch settlements balance, deferred revenues and expenditure, and some other items.

Table 1.9
Analytical Accounts of Credit Institutions

General Provisions

The source of information for compiling the “Analytical Accounts of Credit Institutions” is a balance sheet aggregated on a monthly basis for credit institutions (including credit institutions’ branches located on the Russian Federation territory) and Vnesheconombank’s balance sheet compiled based on its commercial transactions (excluding transactions on managing the RF foreign debt made by Vnesheconombank as the Russian Federation Government’s agent).

Individual Indicators Highlights

Reserves — cash in the Russian Federation currency in the vaults of credit institutions as well as

¹ Definitions of nonresidents and residents for this table and for the “Analytical Accounts of Credit Institutions” and “Monetary Survey” tables correspond to similar definitions in the balance of payments statistics — see comments to the “The Russian Federation Balance of Payments” table.

² Hereinafter transactions in securities purchased on REPO (from the word “repurchase”) terms shall be treated as deals on the sale (purchase) of securities with the commitment to their eventual repurchase (sale) in a certain period at a previously fixed price.

³ Hereinafter nonfinancial enterprises and organizations used in the “Bulletin of Banking Statistics” shall be rendered as enterprises and organizations engaged in marketing goods and services and not referred to the economy’s financial sector.

credit institutions' funds deposited in the CBR (balances on correspondent accounts, required reserves, deposits, investments into the CBR bonds, other).

Foreign assets — balances on credit institutions' accounts recording transactions made with nonresidents in foreign currency, the Russian Federation currency and precious metals (balances on correspondent accounts; deposits and other funds placed in nonresident banks; credits extended to nonresident banks, nonresident legal entities and individuals, debt liabilities, and bills acquired from foreign governments, banks and other nonresidents, investments into foreign companies' and banks' shares of stock) as well as foreign currency cash in credit institutions' vaults.

Claims on general government — credits extended to Minfin, fiscal authorities in the RF member—territories and to local authorities, to the government extrabudgetary funds of the Russian Federation and of the Russian Federation member—territories, securities issued by the Russian Federation Government, the RF member territories, and local authorities and held by credit institutions.

Claims on nonfinancial public enterprises — credits (including debt outstanding), deferred interest on credits extended to nonfinancial government enterprises.

Claims on nonfinancial private enterprises and households — credits (including outstanding debt), deferred interest on credits extended to nonfinancial nongovernment enterprises, self—employed individuals and households, as well as credit institutions' investments into securities issued by private sector enterprises.

Claims on other financial institutions — funds transferred to financial (except for credit ones) institution regardless of their type of property and credits extended to the said organizations¹.

Demand deposits — balances held by the Russian Federation residents (enterprises, organizations, self-employed individuals and households) on checking, current, deposit, and other demand accounts (including plastic cards payment accounts) opened with credit institutions in the Russian Federation currency.

Time and saving deposits and foreign currency deposits — balances on time deposits and other funds held by the Russian Federation residents (enterprises, organizations, self—employed individuals and households) contracted for a specific term and kept with credit institutions in the Russian Federation currency and in foreign cur-

rency, and clients' accounts (except for credit institutions) in precious metals.

Restricted deposits — amounts on accounts with credit institutions whose owners cannot use them during a certain period of time due to terms of contract or current terms of the credit institution's operations (for instance, accrued interest on deposits with yet nondue payment date, clients' accounts reserved for conducting conversion transactions and futures transactions in purchase/sale of hard currency, and some others).

Money market instruments — additional financial instruments issued by credit institutions and representing similar money substitutes, i.e. bonds, deposit and saving certificates, bills, and bank acceptances circulating outside the banking system.

Foreign liabilities — funds drawn by credit institutions from nonresidents: balances on LORO accounts, credits contracted, deposits, and other funds denominated in foreign currency, in the Russian Federation currency, and precious metals and contracted from nonresident banks, nonresident individuals and legal entities.

General government deposits — balances on accounts of the federal budget, the Russian Federation member territories' budgets and local budgets, deposits and other funds drawn by Minfin, financial authorities of the Russian Federation member territories and local authorities, government extrabudgetary funds of the Russian Federation member—territories and local authorities.

Liabilities to monetary authorities — debt of operating credit institutions on the CBR credits (including debt outstanding and overdue interest) as well as funds extended by the CBR to credit institutions on the REPO terms. In contrast to the "Claims on Credit Institutions" aggregate represented in the "Analytical Accounts of Monetary Authorities" table, they do not include the amount of debt referred to credit institutions with revoked licenses.

Capital accounts — credit institutions' own funds. They include authorized and supplementary capital, special, provident and other funds formed through profits, reserves formed to cover possible losses on active transactions, securities, precious metals and funds in foreign currency, revaluation results, and also retained profits.

Other items (net) — assets and liabilities balances excluded from the above enumerated aggregates; they feature transactions among credit institutions and interbank transactions as well as transactions related to credit institutions' logistics operations (fixed assets accounting entries (less depreciation), capital investments, and other costs associated with economic activities, revenues and de-

¹ List of financial institutions was specified in the "Rules for Accounting in Credit Institutions Located on the Russian Federation Territory" No. 61 approved by the CBR on 18.06.97; it incorporates investment funds; trust, leasing, and factoring companies; stock and currency exchanges; brokers operating in the stock market; insurance companies, nongovernment pension funds, and a number of other financial institutions.

ferred costs), gold and other precious metals reserves.

Table 1.10
Monetary Survey

General Provisions

The “Monetary Survey” table presents results of consolidating data shown in the “Analytical Accounts of Monetary Authorities” and “Analytical Accounts of Credit Institutions” tables (consolidation is made through subtracting all mutual claims and liabilities between credit institutions and the CBR and by adding up their transactions in other economic sectors to nonresidents’ transactions). The table is based on the data from the CBR monthly balance sheet, balance sheet of operating credit institutions (including credit institutions’ branches located in the Russian Federation territory) aggregated in a monthly basis, and Vnesheconombank’s balance sheet compiled based on its commercial operations (excluding its transactions on managing the Russian Federation foreign debt which Vnesheconombank makes as the Russian Federation Government’s agent), flash reports by Minfin on administering international reserves.

Individual Indicators Highlights

Net foreign assets of monetary authorities and credit institutions — balances of transactions in assets and liabilities made by monetary authorities and credit institutions with nonresidents in foreign currency, in the Russian Federation currency and precious metals.

Domestic credit — totality of the banking system’s claims on government nonfinancial enterprises, private sector, including households, financial (except for credit ones) institutions and net credit to general government in the Russian Federation currency, in foreign currency, and precious metals.

Net credit to general government — the banking system’s claims on Minfin, fiscal authorities in the Russian Federation member territories and local authorities, government extrabudgetary funds and extrabudgetary funds in the Russian Federation member territories and local authorities less deposits and other investments of the specified organizations into the Russian Federation banking system.

Money — all money supply in the country’s economy which can be immediately used for making payments. This aggregate is compiled as an array of aggregates “Money Outside Banks” and “Demand Deposits” in the banking system.

Quasimoney — banking system deposits which can not be directly used for making payments and are less liquid than “Money”. This includes time deposits in the Russian Federation currency and all deposits in foreign currency. An array of the “Money” and “Quasimoney” aggregates form a “Broad

Money” aggregate (money M2 according to the monetary survey methodology).

Other items (net) — sum total of corresponding aggregates in the “Analytical Accounts of Monetary Authorities” and “Analytical Accounts of Credit Institutions” tables as well as a sum of differences in credit institutions’ and the CBR data on mutual debt.

Table 1.11
Money Supply (National Definition)

General Provisions

The “Money Supply (National Definition)” table shows volume, profile, and dynamics of money supply, which is one of the major financial aggregates used in formulating economic policies and identifying quantitative criteria for macroeconomic proportions. Money supply is defined as an array of funds denominated in the Russian Federation currency intended as payments for goods, works, and services, as well as for savings by nonfinancial enterprises, organizations, and households which are residents of the Russian Federation.

The source of information for calculating money supply is data from monthly aggregate balance sheets of the Russian Federation operating credit institutions (also recorded are credit institutions’ liabilities for (liabilities balances) to economic transactors).

Along with releasing information on the volume, profile, and dynamics of money supply through “Bulletin of Banking Statistics”, it is also available on the CBR web site in the Internet, as well as in the “Bank of Russia Bulletin”.

Individual Indicators Highlights

Money supply can be identified through two components.

Cash in circulation (money aggregate M0) — the most liquid part of the money supply accessible for immediate use as a payment means; includes bank—notes and coins in circulation (see the “Money Outside Bank” indicator in the “Analytical Accounts of Monetary Authorities” table).

Noncash funds include balances of nonfinancial enterprises, organizations, self—employed individuals, and households on checking, current, deposit, and other claim accounts (including plastic cards accounts) and term accounts open with credit institutions in the Russian Federation currency.

Money supply (M2) is calculated as a sum total of cash in circulation and noncash funds. The money supply in the national definition in contrast to a similar indicator calculated by the monetary survey methodology (as a sum total of “Money” and “Quasimoney” aggregates — see comments to “Monetary survey” table) does not include deposits in foreign currency. However, it does partially incor-

porate restricted deposits singled out as an independent aggregate when compiling the monetary survey and unrecorded calculating money supply aggregates.

Section 2. Major Indicators and Instruments of the Bank of Russia Monetary Policy

The CBR major function comprises development and conduct of a unified government monetary policy aimed at defending and securing the sustainability of the ruble.

To implement the said function, the CBR applies a set of techniques and methods specified in the Federal Law “On the Russian Federation Central Bank (Bank of Russia)”: interest rates for the CBR transactions, percentage ratios for required reserves deposited in the CBR, open market operations, banks refinancing, foreign exchange regulation, and other.

The present section contains information characterizing major areas of the CBR operations as well as instruments and methods applied for monetary regulation of the economy.

Table 2.1
Bank of Russia Balance Sheet

General Provisions

In compliance with Article 25 of the “On the Russian Federation Central Bank (Bank of Russia)” Federal Law, Bank of Russia monthly publishes its consolidated (grouped) balance sheet integrating balances across all its institutions and affiliates. The balance sheet structure for publication purposes is set by the Bank of Russia Board of Directors. The CBR balance sheet data are used for different purposes including monetary analysis and research, planning and control in monetary policies sphere, application of rules and implementation of decisions on specific uses of monetary policy instruments.

Methodological framework for compiling the CBR aggregate balance sheet is set by the “Rules for Accounting in the Russian Federation Central Bank (Bank of Russia)” on 18.09.97 No. 66. Pursuant to the specified Rules, the compilation of the aggregate balance sheet is exercised through the use of major international accounting standards. (The only difference deals with the application of a cash method of accounting for records of the CBR revenues and expenditures in compliance with which revenues and expenditures are entered to relevant accounts after revenues are actually received and expenditures made. International standards prescribe accrual basis of accounting which implies recording of all revenues and expenditures over the reporting year regardless of actual timing of their execution).

Along with the publication in the monthly “Bulletin of Banking Statistics”, the Bank of Russia’s balance sheet is included in the “Bank of Russia Annual Report” and it is also placed on the CBR Internet web site.

Individual Indicators Highlights

By assets

Precious metals — this entry records precious metals reserves at purchasing price.

Foreign currency and securities held by non-residents — include the CBR balances in ruble equivalent on correspondent accounts with non-resident banks, balances on deposit accounts with nonresident banks as well as nonresidents’ securities acquired by the CBR.

Credits and deposits — include credits extended to and deposits made by the CBR in resident credit institutions in domestic and foreign currencies, for servicing the government foreign debt and to enterprises and organisations serviced by the CBR’s institutions, and settlements on domestic government debt of the former USSR.

Securities — record the CBR investments into government securities (excluding liabilities bought on the REPO terms) as well as into shares of stock of affiliates and subsidiaries, and banks.

Other assets — incorporate balances on Bank of Russia fixed assets accounts, the Bank’s claims on other operations, investments in securities from the Bank of Russia’s additional pension funds, operations—related settlements and other Bank of Russia transactions.

By liabilities

Cash in circulation — sum total of the CBR bank—notes and coins issued for circulation.

Funds on accounts with the Bank of Russia — include cash balances on correspondent, deposit accounts, and required reserves accounts deposited by credit institutions with the CBR, accounts balances with the Russian Federation Central Bank open for recording budgetary funds of the federal budget and budgets of republics and lower regional levels, as well as extrabudgetary funds, and the CBR other clients’ budgets.

Float — record cash flows in settlements on Russia’s territory.

Capital — is formed as a sum of authorized capital, supplementary capital, reserve fund, and special earmarked funds, with Bank of Russia losses in 1998 taken into account.

Other liabilities — include balance of deferred income and expenditure on securities transactions, on credit operations, amounts of Bank of Russia

bonds, the IMF loan, and balances on some other accounts.

Table 2.2
Refinancing Rate

General Provisions

The “Refinancing Rate” table presents dynamics of changes in the refinancing rate since December 1995 (more prolonged dynamics of the refinancing rate since 1.01.91 can be found on the CBR web site in the Internet).

Data on the effective refinancing rate are allocated on the CBR web site in the Internet on the next day after being fixed by the Board of Directors, are disseminated through the Reuters agency, and published weekly in the “Bank of Russia Bulletin”.

Individual Indicators Highlights

Refinancing rate — monetary instrument by means of which the CBR affects interbank market rates, and rates on deposits of legal entities and individuals, and also rates on credits extended to them by credit institutions. Refinancing rate is one of the interest rates used by the CBR for extending credits to banks in the form of refinancing.

Table 2.3
Credit Institutions’ Fixed Percentage Ratios in Bank of Russia Required Reserves

General Provisions

The “Credit Institutions’ Fixed Percentage Ratios in Bank of Russia Required Reserves” table shows the dynamics of changes in fixed ratios in required reserves by terms and types of legal entities’ and individuals’ funds denominated in the Russian Federation currency and foreign currency and drawn by credit institutions.

Data on ratios in required reserves and their changes are published by the resolution of the CBR Board of Directors in the weekly “Bank of Russia Bulletin”. These data are also placed on the CBR Internet web site and disseminated through Reuters agency.

Individual Indicators Highlights

Required reserves (reserve claims) — one of the major instruments of the CBR monetary policy. They represent a mechanism for regulating the banking system’s general liquidity. Reserve requirements are set with a view of restricting credit institutions’ lending facilities and making barriers to unrestricted growth of money supply. Once a credit institution’s license for banking operations is revoked, its required reserves deposited with the CBR can be used

for repaying credit institution’s liabilities to its depositors and creditors.

Pursuant to Article 38 of the Federal Law “On the Russian Federation Central Bank (Bank of Russia)”, required reserves in percentage to credit institutions’ liabilities as well as the order of depositing them in Bank of Russia are set by the Bank of Russia Board of Directors.

Table 2.4
Individual Indicators of the Bank of Russia Deposit Transactions on the Money Market

General Provisions

The CBR makes deposit transactions in compliance with Article 45 of the “On the Russian Federation Central Bank (Bank of Russia)” Federal Law with a view to regulate the banking system’s liquidity through drawing banks’ funds into deposits. Deposit transactions are made only with resident banks and denominated in the Russian Federation currency.

The “Individual Indicators of the Bank of Russia Deposit Transactions on the Money Market” table contains indicators on the CBR deposit transactions with Moscow region banks: average rates weighted by terms of attracting deposits and the share of deposits by terms of attraction in the total volume of attracted deposits. Data source is the CBR general register on the money market transactions.

More details on terms and procedures of making deposit transactions are available in the CBR Provisions “On the Bank of Russia Procedures for Making Deposits with Resident Banks in the Russian Federation Currency” No. 67—P dated 13.01.99.

Along with the “Bulletin of Banking Statistics”, data on the CBR deposit transactions are also available on the CBR Internet web site and on Reuters CBDEPOS page where flash updates are made.

Individual Indicators Highlights

Overnight — one day deposit transaction (for Friday—made deposit transactions the term covers Friday to Monday including) where funds transfer to the CBR deposit account is made on the date of transaction while deposit funds are reflowed and interest is paid on the following day after funds are entered to the CBR deposit account.

Tom/next — one working day deposit transaction (for Thursday—made deposit transactions the term covers Friday to Monday including) where funds transfer to the CBR deposit account is made on the date of transaction while deposit funds are reflowed and interest is paid on the following work-

ing day after funds are entered to the CBR deposit account.

1 week — deposit transaction made for seven calendar days where funds transfer to the CBR deposit accounts is made on the date of transaction while deposit funds are reflowed and interest is paid on the seventh day after funds transfer to the CBR deposit account (should the seventh day of the deposit term be a day off, than on the following working day).

2 week — deposit transaction made for fourteen calendar days term where funds transfer to the CBR drawn facilities account is made on the date of transaction while deposit amount is reflowed and interest is paid to the bank on the fourteenth day after the funds receipt on the CBR drawn facilities account (should the fourteenth day of the deposit transaction be a day off, than on the following working day). The CBR has been engaged in “2 weeks” deposit transactions since 8 October 1998.

The CBR can also make deposit transactions on other standard terms.

Table 2.5
Official US Dollar to Ruble Rate

Table 2.6

Official Euro to Ruble Rate

Table 2.7

Official German Mark to Ruble Rate

General Provisions

Foreign currencies' official rates to the Russian ruble are fixed and quoted by the Russian Federation Central Bank pursuant to Article 52 of the Federal Law “On the Russian Federation Central Bank (Bank of Russia)”. They are applied for calculating revenues and expenditures of the government budget for all types of payments and settlements by the government with enterprises, associations, organizations, and households as well as for taxation and accounting.

Foreign currencies' official rates to the Russian ruble are quoted daily by the CBR to Reuters agency and mass media. They also are published in the weekly “Bank of Russia Bulletin” and placed on the CBR Internet web site.

Individual Indicators Highlights

Official US dollar to ruble rate — is set daily and enacted from the following calendar day. Till 16 August 1998 it was calculated as an arithmetic average of the US dollar purchase/sale rate for Russian ruble on the CBR transactions on the interbank market. Since 17 August 1999 the rate has been set by the CBR based on the current day quotes for foreign exchange markets (both stock market and OTC) based “US dollar to Russian ruble” transactions.

Official Euro to ruble rate — is computed and set based on the US dollar to Russian ruble official rate and Euro to US dollar rate on the international foreign exchange markets.

Official German mark to ruble rate — is computed and set based on the Euro to Russian ruble official rate given the German mark to Euro recalculation rate set by the EU Board's decision dated 31 December 1998.

Table 2.8

Bank of Russia Precious Metals Quotes

General Provisions

With a view to organize the interbank precious metals market in the Russian Federation and pursuant to the Federal Law “On the Russian Federation Central Bank (Bank of Russia)”, the CBR daily quotes purchase/sale rates for refined gold, silver, and platinum in bars. The “Bank of Russia Precious Metals Quotes” table exemplifies daily quotes of the above mentioned precious metals for the reporting period. Quotes are computed by the CBR in compliance with the “Interim Procedures for Bank of Russia Quoting Purchase and Sale Rates for Refined Gold, Silver, and Platinum in Bars in the Russian Federation Territory” approved by the CBR Order No.01—195 dated 15.07.97 given changes and additions introduced by the CBR Instructions No.89—U dated 22.12.97.

The above indicated quotes are applied on the day of their setting for completing sale transactions in precious metals (gold, silver, platinum) by the CBR with Russian credit institutions on the Russian Federation territory as well as for recording precious metals (gold, silver, platinum) in the Russian Federation credit institutions (discount rates).

Precious metal quotes set by the CBR are published in the “Bank of Russia Bulletin”, disseminated through information agencies (Interfax, Prime-TASS, Reuters, Associated Press, other) and are also placed on the CBR Internet web site.

Individual Indicators Highlights

Bank of Russia sell—buy quotes for precious metals are computed based on data on the evening fixing for gold and platinum and within—the—day fixing as of the previous day for silver at the London “spot” market for available metals through adding (when computing the selling price) and subtracting (when computing the buying price) two percent from metal's cost and converting the resultant cost into rubles per gram: dividing the cost of troy ounce in US dollars by 31.1034807 and multiplying it by the current effective US dollar to Russian ruble rate.

Subsection 2.9

Major Features of Transactions in Government Securities

This subsection features information on the CBR bonds redemption and on indicators featuring the secondary market transactions in GKO—OFZs.

Along with publications in the “Bulletin of Banking Statistics”, information on the government securities transactions is released in a weekly “Bank of Russia Bulletin”, and placed in the CBR Internet web site.

Table 2.9.1

Data on Redemptions and Coupon Payments on Government Securities

General Provisions

The “Data on Redemptions and Coupon Payments on Government Securities” table contains data on redemption costs on the CBR bonds and government securities market. The CBR Bonds are short—term registered securities issued by the CBR since 1998 in a documentary form with 1,000 rubles par value for placing among credit institutions. Due to the suspended issue and cancelled first placement, the CBR is redeeming previous bond issues.

More details on the CBR bonds see in the CBR Provision “On Bank of Russia Marketable Bonds” No.53—P dated 28.08.98.

Data source for the said is the global certificate for the issue and daily MICEX news.

Individual Indicators Highlights

Date of placement — calendar date of placing a security entitled for payment.

Paper code — defines the issue for which payments were made.

Redemption amount/coupon payments — sum total of funds disbursed for redemption.

Marketable volume — current marketable volume as of payment date.

Table 2.9.2

Term Structure of Bonded Debt (with Respect to GKO and OFZ)

Table 2.9.3

Major Parameters of the GKO—OFZs Secondary Market

General Provisions

The table “Term Structure of Bonded Debt (with Respect to GKO and OFZ) contains information on the share of different segments in the total volume of the GKO-OFZ market.

The table “Major Parameters of the GKO—OFZs Secondary Market” contains information on major indicators featuring the GKO—OFZs secondary market.

The information incorporates data on the federal loan bonds with constant yield that are not subject to restructuring as well as on government securities issued for circulation as a result of GKO—OFZs restructuring with redemption due December 1999. These securities present government bonds whose conditions of issue, marketability and redemption are defined in compliance with the Russian Federation Government’s order dated 12 December 1998 No. 1787—P “On the Government Securities Novation” and are intended for replacing government short—term noncoupon bonds and federal loan bonds with permanent and non—coupon yield (GKO—OFZs) with redemption due 31 December 1999; the issue was offered to the market prior 17 August 1998.

The data source is the information on bids closings at the MICEX.

Individual Indicators Highlights

Share in volume in circulation at par — is calculated as a ratio of the volume in circulation at par of a market segment as of end of the month under review to the volume in circulation at par of the whole market.

Market portfolio indicator — average return weighted by dates prior to redemption and by volume in circulation.

Market turnover indicator — average yield weighted by dates prior to redemption and by turnover.

Government short-term bonds—couponless bonds issued under the GKO—OFZ restructuring scheme with GKO—OFZ maturity term expiring in December 31, 1999.

Federal loan investment bonds—federal loan bonds with zero coupon rate issued under the GKO—OFZ restructuring scheme with GKO—OFZ maturity term expiring in December 31, 1999.

Federal loan bonds with constant yield — are used as the basis for calculating the market portfolio indicators. They do not incorporate 25030 Federal Loan bonds that are long—term bonds with zero coupon.

Federal loan bonds with fixed yield — issued at a fixed coupon rate due to GKO—OFZs restructuring with maturity date due December 1999.

Turnover Ratio — a ratio of daily bids turnover to the market size.

Market Value — GKO—OFZs marketable volume is expressed in monetary terms.

Duration — average time period before redeeming GKO—OFZs—OBRs weighted by marketable volumes.

Section 3. Financial Markets

Subsection 3.1 Interbank Credit Market

- Table 3.1.1**
Monthly Average Moscow Interbank Bid Rates (MIBID)
- Table 3.1.2**
Monthly Average Moscow Interbank Offered Rates (MIBOR)
- Table 3.1.3**
Monthly Weighted Average Moscow Interbank Actual Credit Rates (MIACR)
- Table 3.1.4**
Daily Average Moscow Interbank Bid Rates (MIBID)
- Table 3.1.5**
Daily Average Moscow Interbank Offered Rates (MIBOR) and Daily Weighted Average Moscow Interbank Actual Credit Rates (MIACR)

General Provisions

The tables 3.1.1—3.1.5 present the credit institutions' rates for attracting/offering and loans for conventional fixed terms (1, 3, 7, 14, 21, 30, 60 and 90 days). The tables show range and changes in the interbank multiterm loans. MIBOR and MIACR tables can be used for analyzing fluctuations in posted bid rates as compared against the offered rates and actual rates settled for extended credits. In general, the data in the tables are consistent with other data published in the Bulletin and can be applied to comprehensively analyse the financial market standing.

Data source: daily sampling of credit institutions which are principal agents of the Moscow Interbank Market.

The interbank credit rates are published in the weekly "Bank of Russia Bulletin", the "Bulletin of Banking Statistics" and placed on the CBR Internet web site.

Individual Indicators Highlights

Moscow Interbank Bid Rates (MIBID) and Moscow Interbank Offered Rates are calculated as monthly average from daily recalculated bid/offered rates on interbank credits.

Moscow Interbank Actual Credit Rate (MIACR) is calculated as average monthly weighted of actual transaction volumes of interbank credits.

Moscow interbank bid/offered rates are defined for each date and term as simple average of daily recalculated bid/offered rates for corresponding terms and for all related banks. The calculation, however, does not include bid/offered rates for banks' branches.

For each standard term the posted bid/offered rates are computed as a simple average by the following formula:

$$\bar{p} = \frac{\sum P_n}{n}, \text{ where}$$

\bar{p} — posted current bid/offered rates (MIBID/MIBOR);

P_n — posted current bid/offered rate by a specific bank;

n — number of banks whose data are used for computing specific standard term.

Moscow interbank actual credit rates are calculated for each date and every standard credit term as average weighted of total actual credit contracts. No records are made of rates on credits extended by banks to its branches or on rollover credits.

Interbank actual credit rates are defined for every standard credit term as a weighted average through the formula:

$$\bar{p} = \frac{\sum K_n S_n}{\sum S_n}, \text{ where}$$

\bar{p} — current actual credit rate (MIACR);

K_n — rate of interbank credits extended by n-bank on the previous working day;

S_n — total loans extended by n-bank over the previous working day;

n — number of banks whose data are used to compute a rate for a specified credit term.

Terms are based on number of working days within a period.

Subsection 3.2 Exchange Market

- Table 3.2.1**
US Dollar Trade at Interbank Currency Exchange
- Table 3.2.2**
German Mark Trade at Interbank Currency Exchange

General Provisions

Trade of foreign currencies for Russian rubles is conducted at the interbank exchange markets — special markets licensed by the CBR for arranging purchase and sale of foreign currencies for Russian rubles, including the following settlements. Bids are performed on a daily basis except weekends and public holidays. The bidding participants are shareholders and institutions members of the exchange markets. (The CBR can also intervene to regulate the current ruble exchange rates against foreign currencies). More detailed information on the bid-

ding and settlements procedures is given in the instructions issued by the exchange market authorities in agreement with the CBR (e.g., in the MIEM Rules “On US Dollars Purchase and Sale Procedures at the Moscow Interbank Exchange Market” of 01.10.98).

The “US Dollar Trade at Interbank Currency Exchange” table and the “German Mark Trade at Interbank Currency Exchange” table contain data on the principal interbank exchange markets operating with US dollars and German marks. The data are obtained from monthly reporting of the authorized exchange markets and the CBR regional departments.

The bidding results are published in the “Bulletin of Banking Statistics”, the weekly “Bank of Russia Bulletin” and placed on the CBR Internet web site. In addition, the relevant information is released daily to the mass media for dissemination through the mass media.

Individual Indicators Highlights

Average weighted rate is defined as an average weighted rate with the following formula:

$$\bar{r} = \frac{\sum R_i V_i}{\sum V_i}, \text{ where}$$

\bar{r} — average weighted rate;

R_i — average weighted rate of a bidding session;

V_i — trading volume.

Trading volume is the total number of contracts settled over a bidding session.

Table 3.2.3
Foreign Cash Flow Through Authorized Banks Across Russia

General Provisions

The table “Foreign Cash Flow Through Authorized Banks Across Russia” comprises principal indicators of foreign cash circulation within the RF territory.

Data in the table are obtained from monthly reporting on foreign cash flows and documentary payments in foreign currency by credit institutions licensed for foreign currency transactions (authorized banks).

Information on foreign cash flow through Russia’s authorized banks is published in the “Bulletin of Banking Statistics”, the weekly “Bank of Russia Bulletin” and placed on the CBR Internet web site.

Individual Indicators Highlights

Total foreign currency receipts — include all foreign currency cash receipts to vaults in authorized banks (and their branches) excluding the interbranch turnover.

Banks’ imports (entered to cash account) to Russia — the amount of foreign cash imported to the Russian territory by the authorized banks and entered to cash account.

Purchased from resident banks¹ — amount of foreign cash purchased from resident banks, foreign cash collected and credited to correspondent NOSTRO² accounts with resident banks and also correspondent LORO³ foreign currency accounts with a bank reporting to other resident banks.

Purchased from individuals and accepted for conversion — amount of foreign cash purchased or accepted for conversion (exchange of one foreign currency for another) from individuals (residents and nonresidents) as recorded in the foreign cash registers.

Received from individuals (residents and nonresidents) for entering to their foreign currency accounts — foreign cash received from individuals (residents and nonresidents) for crediting the personal foreign currency accounts with authorized banks (branches), and also for crediting personal foreign currency amounts used for settlements with credit and debit cards.

Received from legal entities for entering to their foreign currency accounts — foreign cash receipts from corporate bodies (residents and nonresidents) to reflect earlier withdrawals from an authorized bank to pay for travels abroad, if there is any surplus, and foreign cash credited to foreign currency accounts by legal entities (residents and nonresidents) based on the Bank of Russia’s permission.

Other receipts include amounts from the following transactions:

- commission for foreign currency conversion transactions;
- receipt of foreign cash bills whose authenticity is proven by authentication expertise certificates;
- fees, sponsors’ and other charitable credits to accounts of businesses and public organizations; earnings from external trade in goods and services credited to corporate accounts;
- credits to resident corporations’ accounts of earnings from duty-free sales for foreign currency;
- credits of foreign cash fees and duties;

¹ Concepts of residents and nonresidents used for compiling tables on “Foreign Cash Flow through Authorized Banks Across Russia”, “Selected Indicators Featuring Foreign Cash Transactions by Authorized Banks’ Exchange Offices”, “Average Foreign Cash Purchase and Sale Transactions with Individuals by Authorized Banks and Their Branches” are determined by the Russian Federation Law “On Foreign Exchange Regulation and Control” as of 10.09.92 No. 1615—1.

² NOSTRO are accounts with the correspondent banks used for mutual settlements.

³ LORO are accounts of correspondent banks keeping funds received or transferred by the banks’ payment orders.

- foreign cash credited by individuals for non-commercial transfers abroad;
- earnings from foreign currency documentary payments;
- other legitimate foreign currency receipts.

Total foreign cash expenses — all types of foreign cash expenditures by authorized banks (branches) except for interbranch turnover payments.

Banks' exports from Russia ("cash" account debit) — amount of foreign cash exported from the Russian Federation by authorized banks.

Sales to resident banks — amount of foreign cash sold to resident banks: foreign cash withdrawals by resident banks from NOSTRO accounts, and foreign currency LORO accounts with a bank reporting to other resident banks.

Sales to individuals — amount of foreign currency sold to individuals (residents and nonresidents) or paid out as a result of foreign currency conversion (exchanged for another foreign currency) as recorded in the foreign cash registers.

Payments from personal foreign currency accounts (residents and nonresidents) — foreign cash withdrawals by individuals (residents and nonresidents) from their personal foreign currency accounts, and foreign cash amounts paid out to individuals (residents and nonresidents) through debit and credit cards.

Payments from corporate foreign currency accounts — foreign cash withdrawals by corporate clients (residents and nonresidents) from their foreign currency accounts to pay off overseas business travels, and foreign cash withdrawals from current foreign currency accounts of corporate entities (residents and nonresidents) as authorized by the CBR.

Other — amount of other types of foreign currency expenditures including costs of documentary payments in foreign currency.

Foreign cash balances at the end of reporting period — amount of foreign cash balance at the end of reporting month.

Table 3.2.4 Selected Indicators Featuring Foreign Cash Transactions by Authorized Banks' Exchange Offices

General Provisions

The "Selected Indicators Featuring Foreign Cash Transactions by Authorized Banks' Exchange Offices" table shows transactions in US dollars and German marks which are the key currencies available at the domestic foreign cash market.

Data are provided by monthly reporting on foreign cash flows and documentary payments in foreign currency by credit institutions licensed for foreign currency transactions (authorized banks).

Along with releasing information on selected indicators of foreign cash operations by exchange offices of the authorized banks through "Bulletin of Banking Statistics", it is also available on the CBR Internet web site.

Individual Indicators Highlights

Average single transaction — average foreign cash involved in one transaction. The indicator is defined as the ratio of foreign cash amount purchased/sold to/from residents or nonresidents for ruble cash to the number of transactions for foreign cash purchase/sale for rubles in cash.

Number of transactions — number of foreign cash purchases/sales for cash rubles.

Average monthly rate — average rate of foreign cash sales/purchases defined as the ratio of cash rubles received/paid for foreign cash to the amount of foreign currency purchased/sold for cash rubles from/to residents and nonresidents.

Average transaction margin — difference between rates of foreign cash purchase and sale.

Percentage share of a specific foreign currency transaction in total volume of foreign cash transactions by exchange offices — share of purchase/sale transactions for a specific currency (US dollar, German mark) in the total volume of transactions in all foreign currencies.

Table 3.2.5 Average Foreign Cash Purchase and Sale Transactions with Individuals by Authorized Banks and Their Branches

General Provisions

The table shows purchase and sale transactions with individuals by authorized banks and their branches ranged by an average transaction amount. This differentiates between totals of foreign cash purchases/sales to/from individuals based on fixed amount intervals for transactions. The information is provided by monthly reporting on foreign cash flows and documentary payments in foreign currency by credit institutions licensed for foreign currency transactions (authorized banks).

Along with releasing information on average foreign cash purchase and sale transactions with individuals by authorized banks and their branches through "Bulletin of Banking Statistics", it is also available on the CBR Internet web site.

Individual Indicators Highlights

Transactions volume-based distribution is defined as the ratio of foreign cash purchased/sold to/from residents and nonresidents in cash rubles to number of foreign exchange transactions in cash rubles reported by each authorized bank's (branch or headquarters for lack of branches). The amount of

purchased/sold foreign cash and the number within—an—interval transactions by all branches or headquarters show the general distribution of the estimated average transaction.

Table 3.3
Corporate Securities Market Indicators

General Provisions

The “Corporate Securities Market Indicators” table shows changes in the RTS—Interfax index which is the official indicator of the Russian corporate stock exchange. The index is computed on a daily basis by the methodology of the Russian Trade System Technical Center and Interfax Information Agency. The index includes 100 stocks selected by their liquidity (bidding value, number of contracts, development of corporate stock market, issuer’s credit rating, etc), market value (capitalization), availability of information about an issuer, and a number of other criteria. The data on contracts selected for the corporate stock index are obtained from the Russian Trade System (RTS) and the Moscow Stock Exchange (MSE).

The RTS—Interfax index is computed and released to users on-line.

Along with releasing information on corporate securities market indicators through “Bulletin of Banking Statistics”, it is also available on the CBR Internet web site.

Individual Indicators Highlights

RTS turnover—turnover totals recorded by RTS.

RTS-Interfax index (foreign currency value)—computed ratio of the current total value of market capitalization of stocks enlisted for calculation to the total market capitalization of stocks in the base period by the following formula:

$$I_0 = 100, I_n = 100K \frac{\text{MktCap}_n}{\text{MktCap}_0}, \text{ where}$$

I_0 — base RTS—Interfax index value (January 5, 1998) fixed as 100;

I_n — current RTS—Interfax index value (foreign currency value) ($n=1,2,3\dots$);

K — adjuster resultant—driving from changes in stock listed for index calculation ($K=1$ in base period);

MktCap_n — current market capitalization of stocks listed for index calculation;

MktCap_0 — base total market capitalization of stocks listed for index calculation.

Total market capitalization of RTS stocks defined as the product of a stock market value in n period by the quantity of these stocks with the formula:

$$\text{MktCap}_n = \sum_{i=1}^N P_{n,i} Q_{n,i}, \text{ where}$$

$P_{n,i}$ — market value of an i -stock at the present moment;

$Q_{n,i}$ — total i -type stocks issued by the present moment;

n — number of stocks listed for index calculation.

RTS-Interfax index (ruble value) defined based on the foreign currency value of the index with account of changes in the US dollar to ruble exchange rate compared to the base period rate. The following formula is used:

$$I_m = I_n \frac{R}{R_0}, \text{ where}$$

I_m — RTS-Interfax index (ruble value);

I_n — RTS-Interfax index (foreign currency value);

R — current US dollar to ruble exchange rate;

R_0 — base US dollar to ruble exchange rate.

Subsection 3.4 **International Financial Markets**

The “International Financial Markets” subsection contains key interest rates of selected member countries of the International Monetary Fund (IMF) and four tables which individually describe financial market sectors. The subsection covers both leading industrial countries and developing countries. This facilitates comparison of profitability of similar financial instruments at financial markets of various countries.

Quarterly interest rates are the simple averages of interest rates for the monthly periods under review.

Data are derived from the International Financial Statistics by the IMF.

Table 3.4.1
Treasury Bills Yield

General Provisions

The “Treasury Bills Yield” table shows yield of treasury bills issued by various countries. The compilation methodology for the indicator can differ under specific provisions for a certain type of transactions in financial assets. In general, treasury bills’ yield is an interest rate of the primary placement of securities or an average weighted rate of securities circulated on the secondary market.

Individual Indicators Highlights

By country computation of government short-term liabilities:

- USA — average annual discount for new issues of T—bills with 3 months maturity;
- Germany — yield of federal T—bills with 12 months maturity;
- Great Britain — auction rate of T—bills placement for 91 days period. Monthly rates are based on average weighted rates by end of working week;
- Italy — gross average weighted yield of recurrently placed T—bills issues for periods of 3, 6 and 12 months;
- Bulgaria — average weighted yield on one year maturity T—bills sold at an auction;
- China (Hong Kong) — annual yield of T—bills with 91 days maturity;
- Lithuania — average auction rate of T—bills with 91 days maturity.

Table 3.4.2
Money Market Rates

General Provisions

The “Money Market Rates” table shows interest rates on domestic borrowings by financial institutions to maintain current liquidity. This indicator is usually obvious from overnight credit interest rates but may also be defined for longer credit terms (up to three months) based on different monetary market specifications.

Individual Indicators Highlights

By country computation of domestic short-term borrowing rates:

- USA — interbank daily average interest rate;
- Japan — overnight interest rate at Tokyo interbank market;
- France — average monthly interest rate for overnight loans pledged with private bills;
- Germany — overnight interest rate defined as average weighted rate based on relevant rates for every ten days;
- Great Britain — offered overnight bid rate;
- Italy — average weighted interest rate on interbank three months loans;
- Indonesia — overnight interbank interest rate;
- Korea — average weighted interest rate on overnight loans;
- Singapore — monthly average interest rate on interbank three—months loans;
- Ukraine — average weighted interest rate on interbank overnight loans;

- China (Hong Kong) — average interest rate on interbank overnight loans;
- Bulgaria — average weighted interest rate on interbank loans;
- Lithuania — average interest rate on interbank one months loans.

Table 3.4.3
Deposit Rates

General Provisions

The “Deposit Rates” table shows rates for attracting residents’ funds to demand, time and savings deposits. Time and savings deposits are classified according to the borrowing period. Banks and some other financial institutions attracting deposit money can issue deposit certificates distinguished by different period of depositing and quantities of single value deposits.

Individual Indicators Highlights

By country computation of resident deposit rates for demand, time and savings deposits:

- USA — rate is computed based on daily unweighted three month deposit rates at secondary market, posted by at least five dealers at the beginning of an operational day;
- Japan — average rate for three months time deposits for amount from 3 to 10 million yens;
- France — rate of tax exempt savings;
- Germany — rate of three month deposits under 3 million marks;
- Great Britain — average of four key clearing London banks rates on savings deposits with instant access and an average balance of 10,000 pounds;
- Italy — rate on current accounts, savings accounts and deposits;
- Indonesia — average weighted rate on three months deposits with commercial banks;
- Korea — maximum rate settled by the Bank of Korea on a one month or above time deposits with commercial banks;
- Singapore — average rate on 3 months time deposits settled by ten key commercial banks;
- Ukraine — average deposit rate in domestic currency;
- China (Hong Kong) — average weighted rate on one month time deposits of ten key banks;
- Bulgaria — average weighted rate offered by commercial banks for one—month time deposits in domestic currency;
- Lithuania — average weighted rate on time deposits in domestic currency.

Table 3.4.4 Lending Rates

General Provisions

The “Lending Rates” table encompasses lending interest rates offered to the private sector including both individuals and nongovernment enterprises and institutions. The rates are classified on the basis of borrowers’ solvency and lending targets.

Individual Indicators Highlights

By country computation of private sector lending rates:

- USA — key banks short term lending rate for the most reliable borrowers;
- Japan — average weighted rate settled by all banks for short and long term credits;
- France — lending rate of commercial banks to the most reliable borrowers;
- Germany — rates on crediting current accounts with minimum balance of 1 million marks;

- Great Britain — minimum base rate of London clearing banks;
- Italy — average rate settled for short term lira credits;
- Indonesia — average weighted lending rate for private loans pledged with working capital;
- Korea — minimal rate settled by deposit money banks for one year loans to large enterprises pledged by fixed assets;
- Singapore — minimal lending rate reflecting an average rate settled by ten key banks;
- Ukraine — average weighed rate for domestic currency loans by all commercial banks;
- China (Hong Kong) — rate fixed by the Hong Kong and Shanghai Banking Corporation;
- Bulgaria — average weighted commercial rate for one—year loans in domestic currency;
- Lithuania — average weighted rate for all domestic currency loans.

Section 4. Credit Institutions Performance

Subsection 4.1 General Description

Table 4.1.1 Number and Structure of Credit Institutions

General Provisions

The “Number and Structure of Credit Institutions” table provides data on the number and structure of the registered credit institutions in the Russian Federation.

Registration of credit institutions, licensing for banking operations and licenses withdrawal are performed by the CBR pursuant to Articles 4 and 58 of the Federal Law “On the Russian Federation Central Bank (Bank of Russia)” and Article 12 of the Federal Law “On Banks and Banking Activity” (for the registration and licensing procedures for credit institutions see also the CBR Instruction “On Use of Federal Legislation Regulating Registration of Credit Institutions and Licensing for Banking Activities” No.75—I dated 23.07.98)

The CBR keeps the State Register of Credit Institutions. The Register includes records of credit institutions — banking and nonbanking — for which the CBR took a decision on registration and licensing for banking activities. The Register also records credit institutions’ branches and representative offices in Russia and abroad.

Information on official registration of credit institutions, changes in their names, location, restructuring and breakdowns are reported in the weekly “Bank of Russia Bulletin” and placed on the CBR Internet web site.

Individual Indicators Highlights

The concepts of a credit institution, bank and nonbanking credit institutions are determined by the Federal Law “On Banks and Banking Activity” (Article 1):

Credit institution — legal entity authorized by a special CBR permission (license) to make its profits from banking transactions within the framework of the above legislation. A credit institution is established as an economic entity.

Bank — credit institution having an exclusive authority for complex banking operations, namely: to attract deposits of legal entities and individuals, to accommodate raised funds on its behalf and at its cost on terms of repayability, chargeability, and promptness, and also to open and keep banking accounts of individuals and incorporated entities.

Nonbanking credit institution — credit institution authorized for selected banking operation, within the range specified by the CBR.

Registered credit institutions — credit institutions having on a reporting date the status of legal entities, including those ones prohibited to perform banking operations but still existing as legal entities.

Credit institutions licensed for banking transactions — registered credit institutions entitled to conduct banking operations, as well as nonbanking institutions registered by other authorities (before enactment of the Federal Law “On Banks and Banking Activity”) but licensed for banking transactions by the CBR.

Authorized capital of credit institution is based on shares and provides a minimal amount of assets serving as guarantee for creditors (Article 11 of Federal Law “On Banks and Banking Activity”). The size

of authorized capital is not restricted by legislation but, to assure a credit institution's stability, the CBR introduced the minimal amount of authorized capital (minimal authorized capital for newly established credit institutions should not be less than the sum equivalent to 1 million euros).

Registered authorized capital of operating credit institutions — authorized paid-up stock included in a credit institution's charter and registered by the CBR.

Branches of operating credit institutions — separately located structural units of credit institutions having a different location and performing on their behalf a full range or selected banking transactions specified by the CBR license.

Starting from 1.01.98 the line "Sberbank branches" records Russia's Sberbank branches entered into the State Register of Credit Institutions with reference numbers attached (initially the Register kept only a total number of Sberbank branches equaling 34426).

Representative offices of operating credit institutions — autonomous structural units of credit institutions having a different location, acting on their behalf and protecting their interests. Representative offices are not entitled for banking transactions.

Credit institutions with revoked licenses — credit institutions whose banking licenses were revoked by the CBR's resolution based on the Federal Law "On the Russian Federation Central Bank (Bank of Russia)".

Once a resolution on revoking a license is published, a credit institution loses its authority to make transactions or complete contracts except for ones specified in items 3 and 4, section 4, Article 20 of the Federal Law "On Banks and Banking Activity", and item 2.1 of the Russian Federation Central Bank Provisions "On Banking Licenses Revocation from Banks and Other Credit Institutions in the Russian Federation" No. 264 dated 2.04.96.

Credit institutions subject to liquidation — credit institutions subject to liquidation by the decision of a general meeting of stockholders (voluntary liquidation) or by the court of arbitration (forced liquidation).

Decision on liquidation of a credit institution shall precede its license revocation.

Decision by a general meeting of stockholders on voluntary liquidation, except for a voluntary bankruptcy case, can be taken prior to revoking the license.

Credit institutions in receivership with court—appointed interim trustees — credit institutions judged insolvent (bankrupt) by the court of arbitration or voluntarily acknowledging their insolvency (bankruptcy) pursuant to Chapter XI of the Federal Law "On Insolvency (Bankruptcy)" and run by interim trustees with powers to operate the

institution in bankruptcy and make management decision.

Table 4.1.2 Credit Institutions Grouped by Registered Authorized Capital

General Provisions

The "Credit Institutions Grouped by Registered Authorized Capital" table is complementary to the "Number and Structure of Credit Institutions" table and presents quantitative distribution by the size of registered authorized capital (see comments to the "Number and Structure of Credit Institution" table). Authorized capital is broken down by intervals giving an overall picture of Russian small, medium and large credit institutions. The quarterly supplement to the "Bulletin of Banking Statistics" provides similar data dissected by Russian regions.

The State Register of Credit Institutions serves as data source for the said.

Along with releasing information on the breakdown of credit institutions by the size of their authorized capital through "Bulletin of Banking Statistics", it is also available weekly in the "Bank of Russia Bulletin", and on the CBR Internet web site.

Table 4.1.3 Selected Indicators of Credit Institutions Performance Grouped by Assets

General Provisions

The "Selected Indicators of Credit Institutions' Performance Grouped by Assets" table includes groups which are shaped through constructing credit institutions series by descending assets criterion with the subsequent grouping into homogeneous—similar assets groups within a series. Such grouping exemplifies cases of concentrated banking investments and borrowings specific groups of banks, and major fund—raising and investment operations by credit institutions with different assets.

Data are taken from the monthly aggregate balance sheet of the operating credit institutions (with all branches). Assets and liabilities items included in the "Credit Institutions Performance" subsection of the Bulletin are broken down by their initial market value at time of purchase. Assets and liabilities in foreign currency, precious metals and securities include revaluation results except for bills which are not subject to revaluation.

Individual Indicators Highlights

Number of branches throughout the RF territory — branches of credit institutions recorded in

the State Register (on the State Register see comments to the “Number and Structure of Credit Institutions” table).

Credits extended — debt (including overdue) of legal entities and individuals to credit institutions on all loans including loans to all—level government authorities, extrabudgetary funds, nonresidents in domestic and foreign currency and in precious metals. Funds provided by credit institutions on REPO terms are excluded, they are shown as investments in securities.

Corporate loans — debt (including overdue) of nonfinancial and financial resident institutions (excluding credit ones) to credit institutions on all domestic and foreign currency loans and precious metals loans.

Personal loans — debt (including overdue) of resident and nonresident individuals and self—employed individuals on consumer loans in domestic and foreign currency.

Bank credits — debt (including overdue) on interbank credits, of which credits extended to non-resident banks. Deposits and other funds placed in banks are excluded.

Outstanding debt on credits extended to enterprises and entities/banks/individuals; — corporations; — individuals — is calculated by the methodology applied when computing relevant lendable amounts. Outstanding debt does not include overdue interest.

Investment in government securities — credit institutions’ investment in Russian government bonds.

Investment in bills — amount of discounted bills in the credit institutions’ portfolio.

Investments in shares and equity interest of resident corporations (except for banks) — credit institutions’ investments in shares of joint—stock resident companies (except for banks) and participating interests of resident corporations (for credit institutions’ investments in securities see also notes to the “Credit Institutions’ Investment Portfolio” table).

Corporate funds with banks — balances on enterprises’ and agencies’ accounts in domestic and foreign currency and precious metals. (Account balances on self—employed individuals’ accounts are not included.)

Budgetary funds with banks — funds of all—level budgets and government extrabudgetary funds.

Personal deposits — demand and term personal deposits by residents and nonresidents, and domestic/foreign currency accounts of self—employed individuals. Accrued interest on deposits is kept on different accounts excluded when this indicator calculating.

Negotiable debt — nominal value of banks’ securities: bonds, deposit and savings certificates, bills and acceptances.

Total assets — value of credit institutions’ assets (balances on accounts reflecting credit institutions’ settlements are included in total assets).

More descriptive data on the selected indicators with dissection by domestic and foreign currency are given in the following tables: “Deposits”, “Deposit and Savings Certificates and Bonds”, “Funds Owned by Legal Entities and Individuals and Raised Through Bills”, “Credit Institutions’ Investment Portfolio”, “Discounted Bills”. This information can be complemented by monthly balance sheets of selected credit institutions which are included on the CBR Internet web site (see the CBR web site for “Credit Institutions” within the “Banking System” section).

Subsection 4.2 Borrowings

Table 4.2.1 Deposits

General Provisions

The table presents data on one of the major transactions in liabilities, namely, borrowings by credit institutions — drawings of domestic and foreign currency from legal entities and individuals to bank deposits. Data are grouped by borrowing periods specified according to the deposits contract terms including all complementary agreements. The table shows total funds raised by the credit institutions in deposits. The data compilation methodology for the information in this table differs from that used for similar data in the “Analytical Accounts of Credit Institutions” table included in the analysis of money supply and its structure. Data in table 4.2.1 is presented in a view to highlight these differences in methodology. The “Deposits” table does not cover deposits of legal entities and individuals with the Vnesheconombank which is not within the scope of credit institutions, but includes the RF nonresident funds. Discrepancies among individual indicators can be found below.

The data are drawn from monthly aggregate balance sheet of Russian operating credit institutions.

Individual Indicators Highlights

Total ruble/foreign currency deposits by maturity — money (cash and noncash rubles and foreign currency) deposited by the owners in banks under determined conditions. Data in the table are presented by type of depositor (individuals and legal entities — corporations and agencies), terms and withdrawal procedures (demand and time deposits).

Demand deposits — funds kept with a bank for an undetermined period which can not be fixed at the time the funds are credited to an account, and

can be completely or partially withdrawn at any time.

Time deposits — money deposits with a precisely determined term of repayment and interest rate.

Personal deposits — demand deposits (including amounts deposited for debit and credit cards settlements) and time deposits by resident and non-resident individuals, and funds on self-employed individuals' accounts.

Corporate deposits — demand deposits (including deposits intended for debit and credit cards settlements) and time deposits of all-level budgets, extrabudgetary funds, financial institutions (except for credit ones), nonfinancial institutions of all types of property, and also nonresident legal entities. (The table "Analytical Accounts of Credit Institutions" shows corporate deposits funds as included in different aggregates (see columns 9, 10, 15 in the table) which apart from deposited money include amounts in settlements and current accounts of resident legal entities, and precious metals accounts.)

Bank deposits include deposits and other money attracted from resident and nonresident banks.

Table 4.2.2
Average Weighted Deposit Interest Rates
in Rubles
Table 4.2.3
Average Weighted Deposit Interest Rates
in US Dollars

General Provisions

The table displays weighted deposit interest rates in Russian rubles and US dollar offered by credit institutions. The data are dissected by type of depositor (individuals, corporations, banks in the table 4.2.2, individuals, corporations in the table 4.2.3) and maturity within a reporting period.

Data source: monthly financial reporting of operating credit institutions (see Bank of Russia Instruction "On Financial Reporting Compilation" No.17 dated 01.10.97 for the main compilation guidelines).

Along with the CBR monthly "Bulletin of Banking Statistics", data on average weighted rates on personal time deposits in the domestic currency are published in the IMF, "International Financial Statistics".

Individual Indicators Highlights

Personal deposit rates by maturity; corporate deposit rates by maturity; banks' deposit

rates, by maturity — annual average weighted interest rates on personal, corporate and banks' deposits attracted within a reporting period with breakdown by maturity: under 30 days, 31—90 days, 181 days—1 year, 1—3 years, over 3 years. Demand deposits are included in the calculation of rates on personal deposits under 30 days.

Average weighted deposit rates for a certain period are defined as follows:

$$\bar{P} = \frac{\sum PV}{\sum V}, \text{ where}$$

\bar{P} — average deposit rate;

P — nominal annual deposit rate;

V — value of a deposit.

Table 4.2.4
Deposit and Savings Certificates
and Bonds

General Provisions

The "Deposit and Savings Certificates and Bonds" table contains data on Russian and foreign currency funds raised by credit institutions by issue of securities (deposit and savings certificates and bonds). Values of the deposit and savings certificates and bonds are given in nominal value with the maturity breakdown. Absence of data on specific periods of borrowing means absence of such borrowings over the described periods.

The data are obtained from the monthly aggregate balance sheet of the Russian operating credit institutions.

Individual Indicators Highlights

Savings (deposit) certificate — a time deposit variety (see comments to indicator "Time deposits" in the "Deposits" table), which is a security proving depositing in a bank, and also a right of the depositor (certificate holder) to receive in the bank—issuer or in its branches after a maturity period of the deposited funds and due interest payment specified in the certificate. The certificates are issued in the Russian rubles. Savings certificates can be held only by individuals, deposit certificates only by legal entities. For more detailed information on the savings (deposit) certificates, see Provisions "On Savings and Deposit Certificates" No.333—U dated 31.08.98.

Bond — a financial security proving the holder's right for receiving, in due time, the nominal value of the bond or any other tangible equivalent. Bonds also provide fixed interest payments or any other tangible equivalent.

Table 4.2.5
Average Weighted Interest Rates on
Deposit and Savings Certificates and
Bonds

General Provisions

The table features average weighted interest rates on deposit and savings certificates and bonds issued in Russian rubles. Data are categorized by maturity of deposit/savings certificates and bonds placed on the primary market. Data source: monthly financial reporting of the operating credit institutions (for the main compilation guidelines see the CBR Instruction "On Financial Reporting Compilation" No.17 dated 1.10.97).

Individual Indicators Highlights

Deposit certificate interest rates by maturity; savings certificate interest rates by maturity; interest rates on bonds, by maturity — average annual interest on funds raised through the certificates and bonds within the reporting period broken down by maturity: under 30 days, 31—90 days, 91—180 days, 181 days—1 year, 1—3 years, over 3 years. The lack of interest rates data over the selected deposit periods indicates unavailability of a particular type of certificates and bonds issued by reporting institutions.

Average weighted interest on deposit/savings certificates and bonds is defined as follows:

$$\bar{P} = \frac{\sum PV}{\sum V}, \text{ where}$$

\bar{P} — average weighted interest rates on deposit/savings certificates and bonds;
 P — annual yield on a matured security;
 V — book value of a security.

Table 4.2.6
Funds Owned by Legal Entities and
Individuals and Raised Through Bills

General Provisions

The "Funds Owned by Legal Entities and Individuals Raised Through Bills" table contains credit institutions' liabilities on issued bills and banker's acceptances.

The data are obtained from monthly aggregate balance sheet of the operating credit institutions.

Individual Indicators Highlights

Bill — direct financial liability completed in a legally prescribed form and issued by a promissor to a billholder which gives the latter an unconditional authority to make claims to the promissor in term of specific amount, time and place.

Banking bill of exchange — bill which is mainly earmarked to attract funds to a bank.

Acceptance — an agreement on repayment of a bill imposing obligation on the acceptor.

Banker's acceptance — bill secured by the bank's unconditional obligation to pay a specific amount after a particular certain period (accepted by the bank).

Total rubles/foreign currency raised by bills, by redemption periods — Russian ruble/foreign currency attracted to the credit institutions by issuing at par bills and discounting bank acceptances.

Total Russian/foreign currency receipts raised by bills and banker's acceptances are broken down by redemption periods. Bills at a particular date sight, and bills at fixed time sight (term bills) are discounted by actual residual period. Demand and fixed—time demand bills are included in the demand position, and bills presented for payment are discounted similarly to term bills.

Table 4.2.7
Average Weighted Interest Rates on Bills

General Provisions

The table contains average weighted interest rates on bills issued by credit institutions.

Interest rates on ruble denominated bills placed on the primary market over report period are given by type of primary holder (legal entities and individuals) and redemption periods.

Data are drawn from monthly financial reporting of operating credit institutions (for the main compilation guidelines and indicators see the CBR Instruction "On Financial Reporting Compilation" No.17 dated 1.10.97).

Individual Indicators Highlights

Interest rates on ruble denominated bills sold to legal entities, by maturity; interest rates on ruble denominated bills sold to individuals, by maturity — average annual interest rates on ruble denominated bills sold to legal entities/individuals with dissection by periods of redemption periods: under 30 days, 31—90 days, 91—180 days, 181 days—1 year, 1—3 years, over 3 years.

Average weighted interest rates on issued bills are defined as follows:

$$\bar{P} = \frac{\sum PV}{\sum V}, \text{ where}$$

\bar{P} — average weighted interest rate on issued bills;
 P — bill's annual yield against redemption;
 V — value of a bill specified in the requisites.

Subsection 4.3 Lending

**Table 4.3.1
Corporate, Interbank and Personal Loans**

General Provisions

Data in the table reflect one of the major banking activities in placing banking resources to be lent to clients (residents and nonresidents). Loans are broken down by currency (Russian and foreign), borrowers (individuals, corporations, banks) and maturity periods (maturity period is a term for repaying of a loan specified in a credit agreement). The ruble and foreign currency loan is lower than that in the "Selected Indicators by Credit Institutions Performance Grouped by Assets" table because of loans extended to all—level budgets, government extrabudgetary funds and precious metals loans to clients.

Data are provided by the monthly aggregate balance sheet of Russian operating credit institutions.

Individual Indicators Highlights

Total loans in rubles/foreign currency— clients' debt (including overdue) to credit institutions on all loans extended. Lended funds totals, apart from the breakdown of specific loans, loans to foreign governments and nonresident legal entities.

Total personal loans in rubles/foreign currency— resident and nonresident personal clients' debt on consumer loans (including overdue), encompass self—employed individuals.

Total corporate loans in rubles/foreign currency, by maturity— debt (including overdue) on all loans contracted to resident financial (except for credit ones) and nonfinancial institutions of all types of property (for "financial institution" and "nonfinancial institution" concepts see notes to "Analytical Accounts of Credit Institutions" table, and comments to "claims on nonfinancial public enterprises" included in "Analytical Accounts of Monetary Authorities" table).

Total loans to banks in rubles/foreign currency— debt (including overdue) on interbank loans.

**Table 4.3.2
Average Weighted Interest Rates
on Corporate, Interbank and Personal
Loans in Rubles**

**Table 4.3.3
Average Weighted Interest Rates
on Corporate, Interbank and Personal
Loans in US Dollars**

General Provisions

The tables contain average weighed rates on ruble and US dollars loans to corporations, banks and individuals. Data are presented by type of borrowers (corporations, banks and individuals in table 4.3.2, corporations and individuals in table 4.3.3) and credit terms. Data source: monthly financial reporting by Russian credit institutions (for the main compilation guidelines and indicators see CBR Instruction "On Financial Reporting Compilation" No.17 dated 10.01.97).

Along with the CBR monthly "Bulletin of Banking Statistics", data on average weighted rates on short term corporate loans in rubles are published in the IMF "International Financial Statistics".

Individual Indicators Highlights

Average weighted interest rates on personal loans/Average weighted interest rates on corporate loans/Average weighted interest rates on interbank loans in ruble/US dollar, by maturity— annual average weighted rates specified in loan agreements with individuals, corporations and banks. The rates are presented in classification by the loan terms: under 30 days, 31—90 days, 91—180 days, 181 days—1 year, 1—3 years, over 3 years.

Average weighted interest rates for corresponding loan periods are defined as follows:

$$\bar{P} = \frac{\sum PV}{\sum V}, \text{ where}$$

\bar{P} — average weighted loan interest rate;
P— contracted nominal annual interest rate;
V— contracted value of loan.

Table 4.3.4 Credit Institutions' Investment Portfolio

General Provisions

Investment portfolio of credit institutions represents aggregate securities in rubles and foreign currency acquired through transactions in assets. The portfolio composition shows credit institutions' investment in bonds, shares and equity interest. Data are dissected by types of securities and groups of issuers. REPO transactions being a relatively new source of high liquid banking resources are singled out of total investment (for REPO contracts see comments to "claims on general government" in "Analytical Accounts of Monetary Authorities" table). The highlighted shares of stock singled out of the overall investments into shares of stock represent those are kept in the credit institutions' portfolio over six month and purchased solely in investment purposes.

Investments in government securities are included at their market value, and in other securities — by purchase value (book value).

Data source: monthly aggregate balance sheet of Russian operating credit institutions.

Analysis of data in the table can be complemented by information on the investment portfolio of individual credit institutions — holders releasing their data to Internet under the CBR Provisions "On Data Release by the Bank of Russia and Credit Institutions — Financial Markets Agents" No.43—P dated 8.07.98.

Individual Indicators Highlights

Security — document compiled in due form which specifies all required details and identifies proprietary rights effective and subject to cession only against its submission.

Securities include bonds (government, municipal, commercial), deposit and savings certificates, and other documents related to securities pursuant to effective law.

Investment in debt instruments¹ — include credit institutions' funds allocated for purchase of government securities, bonds, deposit and savings certificates of various legal entities.

Financial securities in investment portfolio can differ by issuers:

government securities — all Russian government bonds (GKO, OFZ, etc.) including bonds denominated in foreign currency;

securities of the Russian Federation member territories and local authorities;

resident credit institutions' securities — bonds, deposit certificates and other securities issued by resident credit institutions;

nonresident issuers' securities — bonds issued by foreign governments, nonresident banks, and nonresidents issuer's other securities;

other debt instruments — bonds, savings and deposit certificates issued by other legal entities (different from the above).

Investment in shares is defined by:

- resident credit institutions' shares;
- nonresidents' shares;
- other shares (different from the above).

Credit institutions equity interests in legal entities (affiliated and subsidiary joint—stock companies), other participations — records of credit institutions' ownership capital allocated for acquiring interest in authorized capital of resident and nonresident legal entities.

Table 4.3.5 Discounted Bills

General Provisions

The table includes data on the value of discounted bills in credit institutions (including overdue bills).

Data are obtained from monthly aggregate balance sheet of Russian operating credit institutions.

Individual Indicators Highlights

Total discounted bills denominated in rubles — value of bills denominated in rubles/foreign currency and acquired prior to their maturity (including overdue bills).

Total of discounted ruble/foreign currency bills are broken down by promissors:

- bills issued and guaranteed ("avaled") by federal government²;
- bills issued and guaranteed by RF member territories and local authorities;
- bank's bills;
- nonresidents' bills;
- other bills.

¹ In contrast with financial instruments providing equity interests, debt instruments impose strict terms on contract agreements which makes it obligatory for one institution to ensure future payment in favor of another institution as a compensation for borrowing (instruments providing equity interests do not ensure initially agreed interest and principal debt repayment in case of liquidation of the issuer). Claims on debt instruments holders are more privileged compared to stockholders' claims. Earnings from a debt instrument are classified as interest (earnings from financial instruments dealing with equity interests are defined as dividends).

² Aval — warranty implying an obligation to pay a bill on any legal entity or individual (accepter, promissor or endorser). Aval is registered in a form of a guarantor's signature on a bill or its attachment, and as an individual document. Aval is intended to improve security of a bill.

Table 4.3.6
Average Weighted Interest Rates on Discounted Bills

General Provisions

The table contains average weighted rates on discounted bills and loans secured by credit bills.

Average weighted rates on discounted bills and loans against credit bills (ruble and foreign currency) are shown by maturity.

Data source: monthly financial reporting of operating credit institutions (for compilation guidelines see the CBR Instruction "On Financial Reporting Compilation" No. 17 dated 1.10.97).

Individual Indicators Highlights

Interest rates on ruble/US dollar credit bills — interest rates on credit bills—secured loans.

Interest rates on discounted bills denominated in rubles and US dollars, by maturity — interest rates on acquired (discounted) bills.

Average weighted rates on discounted bills or credit bills—secured loans are defined as follows:

$$\bar{P} = \frac{\sum PV}{\sum V}, \text{ where}$$

\bar{P} — average weighted interest rate on bills or credit bills—secured loans;

P — discount rate defined by the formula for annual yield against maturity, or nominal interest credit rate;

V — book value (purchase price) of a discounted bill or value of credit bills—secured loan.

Table 4.4
Credit Institutions' Claims and Liabilities on Financial Derivatives

General Provisions

The table presents credit institutions' liabilities and claims on financial derivatives. Financial derivatives include forward and futures transactions, forward settlement contracts, options, fixed term transactions included in SWAPs and REPOs which fall due not earlier than on the third day after completing the contract. Futures transactions are accounted off—balance from the contract date till the value date. Futures claims on and liabilities to financial instruments with market or official prices (rates) are recorded at these prices and discounted in due order.

Credit institutions' liabilities and claims on financial derivatives are broken down by major financial instruments (rubles and foreign currency, precious metals, securities) and by term of settlements: 2—30 days, 31—90 days, over 90 days. Totals of claims and liabilities across all financial instruments presented in the table also include amounts due for repayment "on the following day".

Data are obtained from monthly aggregate balance sheet (Subsection D "Transactions in Derivatives") of Russian operating credit institutions.
