Bank of Russia Research Conference

Bank of Russia Monetary Policy Review

Moscow, Russia

May 24-25, 2027

The Bank of Russia launches a new round of its regular monetary policy analysis – [the Monetary Policy Review \(MPR\)](#), which is conducted every five years. Regular reviews help systematically assess the efficiency of monetary policy in addressing new challenges and check whether its parameters remain relevant in the changing economic environment. The regulator will take the MPR – 2028 findings into account when updating its monetary policy approaches in the future. As part of the MPR – 2028, the Bank of Russia research units plan to conduct analytical studies across a wide range of issues of Monetary Policy. The Bank of Russia encourages leading experts, researchers, and analysts to join the analysis of monetary policy within these work streams. To discuss the results obtained, the Bank of Russia is holding an international conference on economic research in Moscow on 24–25 May 2027.

The scientific committee of the conference is comprised of the Research Advisory Board of the Bank of Russia. This conference will bring together researchers from academia, central banks, and policy institutions.

Submission topics

Applications are accepted from authors on the topics covered by the [Bank of Russia Monetary Policy Review 2028: Planned Analytical Work and Events](#):

- Inflation target format
- Operational framework of monetary policy
- Retrospective assessment of the effectiveness of monetary policy
